Vaccinations:

Humboldt County Public Health has begun vaccinating educators, including all K-12 educators and childcare workers. Higher education staff and faculty vaccinations are expected to follow. Timing depends on the number of doses available to the county and can change quickly. Humboldt State University continues to work closely with County Public Health on vaccination plans. Based on state and county vaccine priorities, the University will first vaccinate employees who are physically working on campus during the spring semester.

Remember: Stay Healthy and Safe! It's critically important to remain vigilant about protecting yourself and others from spreading illness. Please continue to follow basic health and safety precautions (i.e., wear a face covering, practice social distancing, etc.), don't forget to do a daily wellness self-check before coming to campus, and follow these guidelines if you fail your wellness check. Go to [Campus Ready](#) for comprehensive information about HSU pandemic planning, preparedness, and operations. Find more information about the county's COVID-19 vaccine planning on the [Humboldt County Public Health website](#).

All Humboldt County residents who want to receive the vaccine can submit their contact information through an online form to be notified when doses are available for their tier. Fill out the [COVID-19 Vaccine Interest form](#) and read more about the COVID-19 vaccine from the CDC.

Staff and faculty who want to be vaccinated should complete a survey.
