RECOMMENDED EDITIONS

Open Semiotics (Vols. 1-4) Amir Biglari (Ed.)

“Given that signs and meanings pervade the world in its different aspects, semiotics is naturally open to interactions with other fields, from the humanities and social sciences to the natural and pure sciences. Open Semiotics aims to explore and expand these interactions, and to facilitate new avenues for interdisciplinary and transdisciplinary research, providing insights into a redeployment of disciplinary fields. Such an endeavor, which is intended to benefit the entire scientific community, has drawn upon extensive cooperation. This has resulted in 141 chapters authored by 178 scholars from 58 countries spanning all continents, which represent a broad array of trends and approaches as well as numerous and diverse disciplinary crossings. [...]”

The Reliability of UFO Witness Testimony, Vicente-Juan Ballester-Olmos and Richard W. Heiden, (Eds.)

“[...] the first major book to comprehensively focus on the discussion and current views on problems and challenges posed by the reliability of UFO testimonies. This is a cross-disciplinary compendium of papers by 60 authors from 14 different countries. They are specialists in social, physical, and biological sciences, including psychology (predominantly) as well as psychiatry, sociology, anthropology, history, philosophy, folklore, religion, journalism, engineering, computing, medicine, education, analysts with experience in the critical study of UFO perceivers, and other professionals. This volume shares thematically convergent ideas about the plausibility of alternate explanations for an alleged close-range UFO phenomenon.”
