Linfield Tourney Propose Transformation of ICC Next For HSC Into Student Senate At Retreat Debating Team

Ten members of the HSC Debate team, and forensics instructor Dr. John F. Pauley will leave early on the morning of March 2 for Linfield College, McMinnville, Oregon, to take part in the annual three-day Tournament of Champions.

Resolved: That the U. S. Should Extend Diplomatic Recognition to the Communist Government of China is the official debate subject, and each of the teams will participate in eight Oxford style debates, six Lincoln-Douglas debates, and three rounds of one of the following: Radio speaking, interpretive reading, acting, salesmanship, congress, or job interview.

From fifty to sixty colleges and universities in ten western states are centered in the tournament. This will be the third year that HSC has taken part.

Students representing Humboldt State College are William Busch, Ron Campbell, Pat Hammond, Don Leach, John Mayfield, Jim Parks, Don Raffaelli, Gene Younggreen, Norm Stewart and Deyrol Anderson.

Press - Radio Club To Meet Wednesday

Newest addition to Humboldt State's galaxy of clubs, the Press-Radio Club, will hold its first meeting next Wednesday in the home of Dr. Milton M. Hollstein at 1937 Pine Street, two doors down from the radio hut.

The meeting will begin at 12 noon, with coffee and cookies on the agenda and sack lunches welcome. Open to anyone interested in the field of mass communications, the club will elect its officers in the meeting.

COUNTY TEACHERS HOLD MEET HERE

More than 80 teachers and school administrators from Blue Lake, Arcata, Ferndale and College Elementary School swapped ideas on how to improve instruction Monday.

They met in the first Institute Day to be sponsored by the Humboldt County office of education, the elementary school districts represented and CES. Sessions were held in the CES. The Institute was planned with the help of consultants from the California State Department of Education.

Discussion Will End Religious Emphasis Week Tonight

"Religion is an experience which rests on beliefs," Dr. Frank N. Freeman told Humboldt State College students and faculty Monday in the special assembly which opened Religious Emphasis Week.

The week-long observation of "Religion in Life," draws to a close tonight when A. J. "Tony" Gosselin, prominent Eureka businessman and lay leader, will lead a discussion on "Religion in Business." The discussion will begin at 7:30 p. m. in Nelson Hall.

Dr. Freeman, professor emeritus of the University of California at Berkeley, spoke on "Religion in Life," from the viewpoint of the intellectual temper of our times. He was followed on the program by Dr. Curtis Nims, former pastor of the First Baptist Church of Stockton and now on a national lecture tour for the American Baptist Society.

Dean Freeman gave his "confession of faith," tracing the grad-

ual change from the traditional theologian's religion to a humanistic approach which considered man as inherently good, to a renewed search for something more stable than man to rely on. He declared that many humanists were shocked out of their near-worship of man himself by the totalitarian aggression of the 1940's and by the many problems reoccurring in the post-war era, including that of crime.

Revision of the Inter-Club Council into a student senate was recommended by a special committee when representatives from Campus organizations met Sunday in the annual Winter retreat. The recommendation hit a snag, however, with its provision that club vice-presidents be made automatic delegates, and the attendance be made compulsory.

CU Members Lay Plans For Week

Members of CU are planning the activities for the annual conservation week falling between March 7 and 11. High on the list are the annual assembly and conservation banquet. Other activities such as Disney movies, conservation education showings, and the distribution of pamphlets will highlight the affair.

Plans for the annual assembly, to be held on March 11, center around an Audubon presentation. Plans are being made to obtain both a speaker and an excellent color movie.

This year for the first time the conservation banquet will be held off campus. The distinguished speaker will give his talk to a capacity crowd at the Big Four Inn. The banquet will be held on Saturday, March 12.

Arrangements are being made to have one or two of Walt Disney's full length movies shown on campus one day during conservation week. Conservation education, slide showings, and pamphlets distribution will complete the activities for conservation week.

Plans Underway For 5th Popera

Mrs. Blanche E. Harpham has been announced as chairman of the fifth annual Popera scheduled for Friday, March 25, in the Eureka High School gymnasium.

Mrs. Harpham says that plans are already underway to make this event an enjoyable affair for college students and the community.

As the name indicates the event is a combination of music for both the jazz lover and the long-hair enthusiast. The first part of the evening will include music from the Humboldt Little Symphony, the Lumberjack Band and the A Cappella Choir. Dancing will fill the rest of the evening.

Special highlight of the evening is the annual King contest in which the men of the campus are given a moment in the spotlight. Larry Flammer, chairman of this committee, will soon be contacting clubs to select their candidate for the title.

The committee, one of four set up to deal with problems facing the student government, recommended that each vice-president lose his office and seat on the ICC if more than one unexcused absence is recorded. The committee was headed by Ray Cesaretti, incumbent president of the ICC.

The retreat, meeting as a whole after splitting up for committee discussions, refused to approve the recommendation, but suggested that the proposition be placed before the member clubs.

Another committee, the Assemblies group, headed by Vice-President Bill Glover, recommended revision of the constitution to include a fifth commissioner, whose sole responsibility would be to promote and coordinate assemblies.

The committee also suggested two possible solutions to the low attendance problem.

The committee recommended that a free hour be set aside each Friday, so that no class time would be taken. This, it was felt, would remove one of the greatest objections to underfull usage of the assembly hour.

In addition, the committee recommended that the assembly period be moved away from the noon hour, preferably to 10 a. m. on Fridays. This would remove obstacles to more attendance caused by the cafeteria line in Nelson Hall and the allure of two free hours.

A committee on prestige headed by John Dufour made four recommendations: an honor list for persons with indexes of 2.0 or above; a recommendation that no student hold more than one elective office; an upper-division honorary society on the order of the Knights; and also suggested that the remaining traditional events, such as the Sno-ball and all-school picnic, should be taken over by a club.

Joan Guyn's Frosh Camp committee reported on plans for a pre-registration get-together for incoming freshmen and transfer students.

CANCER TALK TUESDAY

Cancer Detection will be the theme of a speech by Dr. Vincent S. Sansone on Tuesday night, March 1, in the HSC auditorium. Scheduled to start at 7:30, the meeting will consist, in part, of showing films on this vital problem.

Pat Quackenbush

Plays title role tonight

Antigone, HSC Winter Production, To Be Presented Tonight at 8:10

By Craig Stark

"Antigone" is one heck of a good play. Using only the absolute minimum of scenery, with most of the actors still unsure of themselves in their first dress rehearsal and despite lighting experimentation during the rehearsal, the cast of this play completely captivated this audience of one at its Monday night rehearsal.

This modern version of the Sophocles classic, written in 1943 by Jean Anouilh, will be presented to the public by the Humboldt State College players tonight at 8:10 p. m. in the college auditorium. Other performances will follow tomorrow night and next Friday and Saturday evenings.

This is the story of Antigone, the young, idealistic daughter of Oedipus — Oedipus the King, whose tragedy is one of the most renowned in all dramatic literature. Antigone, too, is the central figure in a tragedy. No less here than in her father's flash across the pages of dramatic history, the gods impel heroic but ill-fated mortals to their doom in all the dramatic sweep of Greek tragedy.

But there is another story entwined with Antigone's unwilling march toward extinction. This play was written in occupied France, 1943, and the temper of that period is bound up almost inextricably with the Greece of Creon, the Tyrant.

The play is done in modern dress, the speech is modern, the setting Greek and the play timeless. For here clash the authoritarian and the individual, the practical and the ideal, the gods

and mortals, and Antigone and Creon, each bound on what he thinks right and each compelled to a tragic end.

And through the clash of wills wanders the Chorus, commenting on the play, the problem, the country and on drama itself. The phalanx of Sophocles is reduced to a single man; his comments are not in timbred rhythm, but the sardonic, sympathetic, omnipotent voice of the playwright.

M. Anouilh's conclusion is not obvious. If the scale is tipped toward Antigone's tragic decision to bury her brother's decomposing corpse, the audience may also weigh its verdict in the other direction. The Germans who saw this play when it was produced in 1943 empathized with Creon. More than a few who see it here will probably do the same, so truly are M. Anouilh's characterizations drawn.

Antigone's role will be taken here by Pat Quackenbush, whose Countess Aurelia in "Madwoman of Chailot," was the feature of the fall production. Homer Ratcliff, the Ira Mulford of January's reading of "Sondelis," will play Creon.

The Bull-Sessions

The value of getting together and talking over a problem was never better illustrated than last Sunday's retreat, when representatives from most campus organizations met to discuss problems which have been plaguing students and faculty alike.

In a matter of four hours, the 30-odd students and a handful of faculty members were able to come up with concrete recommendations on four different problems, some of which have been kicking around for years.

Obviously the problems are far from solved. On some phases of the problem, the group could not come to a generally acceptable recommendation. Yet progress was made and undoubtedly some definite improvements based on work done Sunday will be put into effect.

Commendable as all this may be, and in fact was, there is no reason to limit these discussions to twice a year. A new institution called the "bull-session," organized at Humboldt State college this year, fulfills much the same function weekly.

Whether on campus, national or international issues, the time-honored institution of shooting the breeze, to use one of its more polite terms, can be a valuable adjunct to classes and text-books. Happily, enough students at Humboldt State college have recognized the value of this and have responded by attending the weekly sessions.

Next week, as there is nearly every week, a bull-session will be held. Additional members will, we are certain, be welcome. Why not place yourself among them?

Of All Things

By SYD STIBBARD

Last week we thought that a paper was coming out so I wrote something on religious emphasis week. I carried on at an impassioned rate of twelve words a minute, and a careful reading of this would show that I didn't like it very well. I don't go for trumped-up interest, whether it be about our crummy student body voting habits or our professed beliefs.

Also, I sit here without a picture of the week. This is not because I do not have an idea for this week; it is because I do not have a suitable idea. I am bound by my own artifice to be mute, for I am usually ridiculous or silly, but this is not the week others feel so.

Anyone who attempts to be funny is occupied with a subtle seduction of a partner and/or partners. This applies to the court fool and to Milton Berle. By poking fun you invite people to choose their ground. Are they to be on your side (signing up with laughter) or are they not? Your success is measured by the enjoyment you give to others. Nothing could be (or is) more pleasant. However, this is not the week to choose up sides.

I feel very close to a long line of people who could be amusing about this sort of thing, but I don't have the necessary tact. Anatole France's "Revolt of the Angels" was so charming (I'll have to look at it again ...) and charm is what I lack.

Maybe I can whip up something for *Antigone* which will be put on Friday and Saturday.

Faculty Forum . . . Crisis in The Classroom

By Dr. Arthur Smith

The American Association for the Advancement of Science is officially concerned about the crisis in science education. This organization, numbering among its members thousands of scientists, is one of the most influential of such groups. A committee considered the problem and made recommendations which, when they were recently approved by the executive committee, became the official position of the society. Their attention was primarily directed to the teaching of science in the secondary schools. Three main points were covered in the several recommendations adopted.

Several of the recommendations were concerned with improving the conditions and status of the high school science teacher. Various inducements were suggested to make the field more attractive. With the tremendously increased enrollment soon to be expected it will probably be necessary to provide other attractions, in addition to larger salaries, to get and keep trained people in this field.

Other points were concerned with recruitment of capable teachers. Though there are not now many openings there are very few training to fill the positions which will soon be open. While the whole field of secondary education will soon have many more openings than applicants, this is particularly true in the field of the physical sciences for which only a few hundred are now preparing themselves in the entire United States, Alaska, and the Philippines.

The remainder of the recommendations were suggestions as to how practicing physical scientists could aid the high school science teachers.

There is real cause for concern. The United States has been for the last several decades a country which could pride itself both on the absolute rate of its rapid advance in the fields of abstract and applied science and on its relative position with respect to the progress of other countries. In the near future both of these advantages are in serious danger.

In order to cope with the demands of a rapidly increasing population on natural resources which no longer appear as boundlessly rich as they did to our fathers we will require an increasingly effective science and technology. If science is to produce anything like the miracles which are expected of it there must be capable scientists to do the job.

The government of the Soviet Union has recently claimed that it has been ahead of the U. S. in the development of the hydrogen bomb. Even if this is not true it dramatizes a situation which is developing. We were told at the AAAS meeting that the Soviet Union is now producing several times as many scientifically trained people as the United States, that forty per cent of their high school curriculum is in the field of science and that the students are given the mathematical background required for rigorous courses.

At a recent meeting of the United Nations Educational, Cultural, and Scientific Organization attended by representatives of some seventy odd countries all wanted trained people to help with their science education programs. The U. S. had no personnel to spare, but the Soviet Union offered help. The influence of these advisers will not be confined to helping teach and organize courses in mathematics and the sciences. What better opportunity could we ask for making friends and enlisting allies in the struggle for a free world, yet we cannot take advantage of the possibility.

In World War II the United States called itself "the Arsenal of Democracy." We helped win that war by our tremendous resources and our technological superiority. In the Cold War, in a possible Hot War, in the constant war against starvation, disease, and deprivation throughout the world we cannot afford to lose our commanding position in the forefront of scientific and technical advance.

Some of us in Humboldt County are organizing the North Coast Math and Science Association to contribute to the improvement of the situation. Most of our members are teachers at all levels, elementary school through college, but anyone interested in the teaching of these fields is welcome to join. We plan to contribute however we can to the improvement of science teaching and the stimulation of interest in science at all educational levels.

You can help. Some of you are already preparing yourselves for teaching careers. Those of you who have not yet decided on your plans for the future may wish to consider a field in which you can make a real contribution to the welfare of the country, a field in which there will soon be a real demand as well as a great need for your services. Secondary teaching jobs have several decided disadvantages but compensations which will be much more important for many and every prospect for considerable improvement as the need for teachers becomes more and more obvious and as general public and official concern with the problem becomes ever greater.

Even if you are not sufficiently interested to enter this field you can influence your younger brothers and sisters, your younger friends, to prepare themselves in high school for the opportunities in the field of science and science education which now exist and which will inevitably become even more numerous and attractive as the scarcity of present trainees is more seriously felt.

Club Capers

At the beginning of the week members of the Choir journeyed to the Bay Area, a trip they make every two years, to present 15 choral programs at schools on the way to and in San Francisco and the area. They will return Monday.

An assembly will be presented by the Foreign Relations Club shortly. This organization is a brand new one. Its meetings are held every other Thursday. Those interested in joining are asked to contact either Kamal Unis, president, or the club's advisor, Dr. Trainer.

The Recreation division of the College "Y" is planning to sponsor some evenings of folk dancing in the near future. More details on this will be given when available.

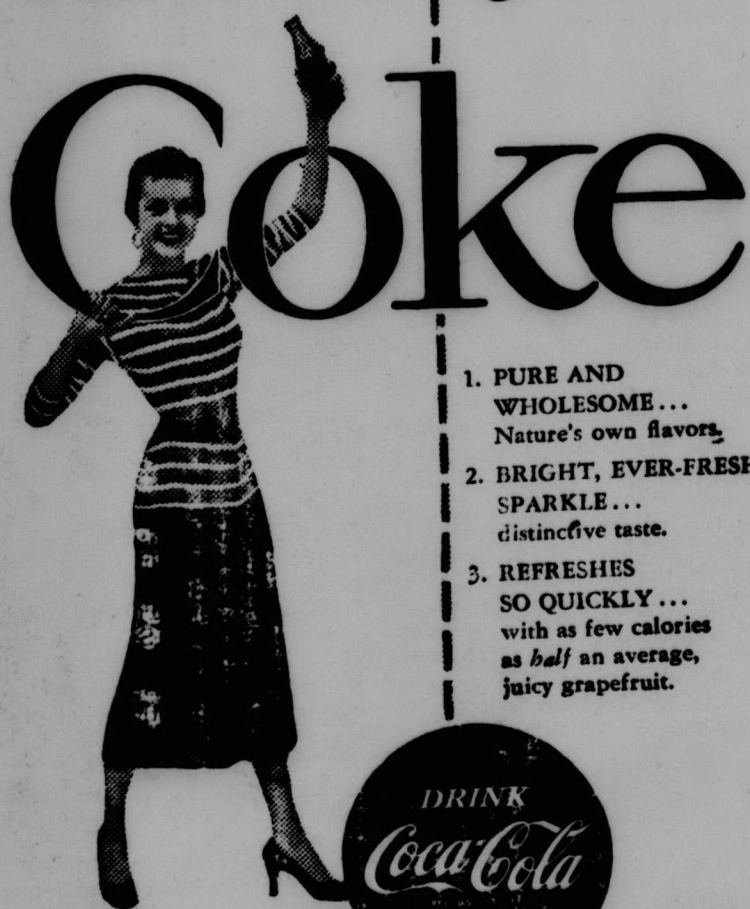

BULLETIN: An anonymous informant, a veteran line-stander, announces that there are 987,360 (plus or minus 750) holes in the acoustical tile of the cafeteria ceiling.

The Flying Club has sprouted wings. It now has its plane. The machine is jointly owned by all of the members.

Plans are progressing and a constitution is being drawn up for the new Press and Radio Club. All who are interested in mass communication are invited to attend next Wednesday's noontime meeting.

Fulkerson Will Perform Sunday

Charles Fulkerson, associate professor of music and concert pianist, will be soloist at the monthly chamber music program in Nelson Hall Sunday at 8 p. m.

Mr. Fulkerson will perform the Bach D Minor concerto, with members of a string group including Esther Thompson, Doris Eikenberry, Marianne Pinches and Ronnie Siemens, violins; Woody Thompson and Floyd Glende, violas; Jean Fulkerson, cello, and John Dufour, string bass.

The college string quartet will play the Brahms Quartet in A Minor. Members of this group are Mrs. Thompson and Mrs. Eikenberry, violins; Mr. Glende, viola, and Mrs. Fulkerson, cello.

CAMPUS Party Line

By JEANNIE

Hi everyone! Here I am back again with news on clothes, people, and campus events. So, if you're interested in what's going on round here, cast an eye downward!

Daly's Sports Shop is leading with fashions that are making news all over the country . . . **3 PIECE COORDINATES!** Pedal pushers, skirt, and blouse that are really IT! You've seen them in "Charm," "Glamour," "Seventeen," and all the other leading fashion magazines. Light, sturdy, washable cotton that maintains crisp, fresh appearance! Colors of orange, black, avocado green with contrasting braid make a striking picture. Sizes 10 to 16, skirt \$6.95, blouse \$3.95, and pedal pushers \$4.95.

Don't be too surprised if you see a couple of girls around campus mumbling and seeming to be a few thousand miles away . . . they're just **DONNA PETERSON** and **WINNIE YOUNG!** I think they're still recovering from the afterword effects of finals!

Daly's Men's Department has something that has never been in Eureka before . . . **4-WAY COLLAR SPORT SHIRTS!** Yes, you can wear the collar four different ways. These all rayon shirts are crease resistant, and washable! Colors of mint green with dark green, pink with charcoal, and cognac with brown. **ONLY \$5.98** to you fellas!

For all you gals—Daly's Sports Shop now brings you a **SHORT MIDDY JACKET** in a Harlequin print to top off your black pedal pushers! This jacket has ¾ length set in sleeves, with a wide, wide 3-inch boat neck collar. Pedal pushers are black with long, smooth tapered legs . . . they're a little longer than usual pants length and what they'll do for you-um-m-m! Both are washable combed poplin! Sizes 10 to 16, jacket \$4.95 . . . pedal pushers \$5.95.

See you 'round campus!

Skunk Costumes Win Mardi Gras Prizes

Pink elephants and skunks were finalists in the couples' costume contest at the Mardi Gras carnival and dance held last Saturday night in the college gym, the prize finally going to Vesta Carlson and Gordon McBride, the "skunks."

Individual costume awards went to Larry Flammer who wore a Superman outfit and to Margaret Molini, donned in the attire of a clown.

Prizes for the annual Newman Club affair consisted of two pound boxes of candy for each winner.

PLAN DRAMA TRIP

Anyone interested in dramatic activity of any kind will be welcomed when the Humboldt State Drama Club makes its annual pilgrimage to San Francisco during Easter vacation, Drama Club President Homer Rateliff announced today. The club plans to see several plays and theatrical facilities at colleges and universities during its three-day stay in the Bay Area. Persons interested should contact Drama Club members, he said.

Knights Pledges Entertain Here

The Yurok Chapter of the Intercollegiate Knights followed their traditional "Tournament of Old" when eleven pledges went through their informal initiation at 12 noon on Friday, February 18. A large crowd of HSC students and faculty witnessed this show in front of the Coop.

John Dufour, a sophomore Business Administration major, was pledge master and the head of the initiation who planned a few things for laughs such as the interpretation of a joust duel, onion eating, egg drop, and a few others.

The pledges are Jim Barnes, Harmon Bonnicksen, Jesse Buck, Bob Eggers, Mike Fielding, Bob Furber, Tom Murdoch, Mel Oliver, Dick Sorensen, Jim Westman and Emil Yurdana.

The formal initiation will be at the Eureka Inn on Wednesday, March 2, 1955, starting at 7:30 p. m.

Humboldt Students Attend CIPA Meet

Three members of Humboldt State publications staff, and advisor Dr. Milton H. Hollstein left Thursday morning for the annual convention of the California Intercollegiate Press Association at San Luis Obispo Friday, Saturday and Sunday.

Sempervirens Editor Ray Smeltzer, Lumberjack Editor Craig Stark and Lumberjack Staffer Fran Stark will attend the three-day convention sponsored by Cal Poly. Career symposiums, a contest judged by Los Angeles Times staffers, and an address by Glenn Hardy of radio fame will highlight the annual get-together.

Uncle Remus comments that his nephew wanted a formal wedding—so they painted the shotgun white.

Lions Club Adds 2 Scholarships

Eureka Lions Club has doubled the number of scholarships they give for the 1955-56 term at Humboldt, President Siemens announced this week.

At present they have two \$100 scholarships. With the presentation of a check for \$400 by Paul Arvidson, two more such awards will be available for the coming year.

With these four scholarships established, the club has more than any other men's service group, although almost all clubs in the area are participating in the college scholarship program.

The two additions also bring the college's total number of scholarships available to students to 107 for the next year.

SA.T.C. PRODUCT OF The American Tobacco Company AMERICA'S LEADING MANUFACTURER OF CIGARETTES

SWINGING THE AXE

By MURL HARPHAM

This week we will pay tribute to a "celebrity amongst us." Few of us realize we have a great all around athlete on the staff here at Humboldt State. He is none other than that jolly fellow, Dr. Joseph M. Forbes, chairman of the division of health and physical education.

Last week Dr. Forbes was honored at a dinner at Occidental College in Los Angeles, his alma mater. The occasion was the announcement of his election to Occidental's Hall of Fame.

Dr. Forbes was honored for his exploits in field events with the great Occidental track and field teams of the early 1930's. At one time he held the WORLD'S RECORD for putting the eight pound shot, which he tossed 74 feet, 3 inches. He also held the Pacific Coast Relays record for the discus throw when he heaved the platter 161 feet in 1933. He also excelled in the javelin toss.

Few people realize that in 1933 he was a little-all-American in football and held the national punting record (we never checked the record books so we don't know if his record has ever been broken). He punted the pigskin 91 yards in the air in 1933. Forbes was also a member of the Basketball team which completes the attributes of an all time great.

Dr. Forbes has coached football and basketball at Comp-ton Junior College, his 1945 grid team winning the national junior college championship.

Coach Forbes joined the HSC faculty in 1946 and has coached football, basketball and track.

Thanksgiving Benefit

Pepperdine college was added to the 1955 football schedule last week with the affair being a Thanksgiving Day benefit game on November 24.

Humboldt will play seven and possibly eight games in Redwood Bowl next fall and two contests away from home with a total of nine or ten games.

Sponsors of the Thanksgiving Day contest will be the Kiwanis club with the proceeds going to Kiwanis youth activities programs.

Flash

Another candidate for the 1975 HSC gridiron team was born last week on Valentine's day. Bob Dunaway and wife, Ann, are the proud parents of a bouncing baby boy. Bob graduated from HSC in 1954 and lettered three years in football and Basketball and was also captain of each sport.

LITTLE MAN ON CAMPUS

by Dick Bibler

"I wish Snarf would seat this guy farther away from the bell—He gets mad as heck when he's waked up suddenly."

Gators Defeat Humboldt Twice

The Humboldt State basketballers wound up the season with a pair of conference losses to the Gators of San Francisco at the Golden Gate city. The first contest saw the HSC Lumberjacks throw a scare at the city boys in the final minutes, but the Gators recovered quickly to finish with a 52-45 win.

The second game the Golden Gators had less trouble with the Hilltoppers as they bounced to a 66-58 win.

In the first meeting San Francisco State got off to a roaring start as they took a 38-26 half-time lead, but the Green and Gold came back strong the second half behind deadeye shooting of Joe Myers and George Ibarreta to tie the game up at 38-38. Then it was the Gators turn under the spotlight and they equalled the occasion to take a slim seven-point lead and hold it till the final horn.

Ibarreta led the scoring for the Jacks with 17 while Myers was held to 12. Bob Liebe led the winners with 18 points.

The second contest opened with the Golden Tide again pouring on the coal early in the game only to have the Lumberjacks put the fire out temporarily. The hosts jumped to a 12-2 lead but HSC quickly cut it to 14-12. At halftime the Gators led 36-24.

In the second half the city boys held a 10-point lead for the better part of the rest of the game.

Humboldt's Paul Shields was high for the night with 19 points while Myers and Ibarreta added 13 apiece.

The two defeats gave HSC a conference record of four wins against six defeats. The double win give Frisco an eight win no loss record which ties them with unbeaten Chico State. The two teams pair off in San Francisco this week-end for the championship.

PREPARE FOR TRIP

The W. A. A. is preparing for its trip to Santa Rosa on the week-end of March 5. The club plans to take a full team plus substitutes to compete in the Inter-collegiate Women's basketball tournament.

Spring Sport Coaches Issue First Call; Prospects Brighter In 1955

At the close of basketball season the spring sport coaches annually issue their call for aspirants in the various fair weather sports.

Baseballers Workouts Hampered By Wet; Open Set In April

As usual, wet grounds are hampering the baseball team's workout after Coach Ced Kinzer issued the first call early this week. At the present the prospects have been conditioning their arms and batting eyes by working out in the gym and quonset hut.

Coach Kinzer is optimistic about the squad's chances this year and is pleased with the number of fresh recruits and returning lettermen.

A few of the topnotch lettermen who are now working out are: Phil Huff, first base; Bill Tuttle, second base; Jack Kinser, outfielder; Happy Half, outfielder; Tom Retzlaff and Ben Henke, pitchers.

Some of the new prospects Kinzer thinks will help the squad tremendously are: Al Gray, pitcher; Jim Richards, pitcher; Bob Lawson, shortstop; Ralph Mayo, third base; Ossie Gooden, fielder, and Bill Wilber, fielder.

The conference baseball schedule is as follows:

April 22, HSC at Cal Aggies, two games.

April 30, HSC at Nevada, two games.

May 7, HSC at San Francisco, two games.

May 10, Sacramento State at HSC, two games.

May 20, Chico State at HSC, two games.

Facts About Jacks

Paul Shields, a transfer from Grant Junior College, has turned out to be one of the top scorers on the Lumberjack basketball squad.

Averaging about 10 points per game or better, Shields is a big help to Joe Myers in the rebounding department. He is exceptionally good at defense and also has a good eye for the basket.

Although Shields is six foot he does not give an impression of being big; therefore his prowess on the backboards often surprises spectators since he looks small in comparison to other players.

Shields is married and has one daughter. They live in Arcata.

Baseball Coach Ced Kinzer had his squad out early this week in the quonset hut while track Coach Bob Doornink has his boys building up for the five-meet season ahead.

Late this week Coach Franny Givins called his tennis team together in preparation of what could be a great year.

An eight-man golf squad, including four veterans from last year's team, is working out at the Bay-side course under Coach Phil Sarboe in preparation for the opening match of the season March 25.

Track Coach Doornink, who hopes to have 40 men on the squad before the opening meet of the season, has issued equipment to about 26 men. Doornink said he hopes to put Humboldt's track team on a firm competitive basis with other Far Western Conference squads despite the wet springs that have plagued other HSC track teams.

Franny Givins, after finishing a "fairly" successful basketball season, will return as tennis coach after previously vacating to coach track last season. He has four returning lettermen to form a nucleus in the persons of Mike Fielding, Paul Jensen, John Marcuz and Bill Williams.

Back from last year's golf squad are Captain Bob Glende, Dennis Boese, Joe Kramer and Jerry Smith. A promising newcomer is John Halbach, a transfer student from Louisiana Tech, which held the 1954 Gulf States conference links championship. Coach Sarboe believes he has a better balanced group than last year's squad.

Tennis Schedule

April 1 and 2, Humboldt, Cal Aggies, Sacramento and Nevada at Davis.

May 14, Conference matches at Chico.

Track Schedule

April 9, tri-meet with San Francisco, Cal Aggies and HSC at San Francisco.
