

# GALA MARDI GRAS FETE TONIGHT

## Banquet To Climax Conservation Week

### STAGE SET FOR FROLICKING ANNUAL EVENT

BY ANGELO LAVAGNINO

After weeks of planning and preparation, the stage is set for the annual Mardi Gras, to be held tonight at Carson Memorial, Harris and J Streets, in Eureka. This frolicking event is sponsored by the Newman Club of HSC, which each year endeavors to make it a bigger and more colorful event. Claude Gribble's orchestra will furnish the music which starts at 9 p. m. and continues until the sandman beckons at 1 a. m.

Although the Mardi Gras is a time to wear a costume, costumes are not required. However, in order to add to the happy confusion when dancing with a masked, costumed partner, it is hoped that as many people as possible will attend in costume. But costume or not, attend the Mardi Gras, anyway, for an enjoyable evening. For those who don't care for dancing, conversation will be free. Also, it is reported, a large quantity of delicious punch will be on hand.

One of the highlights of the evening will be the crowning of the King and Queen of the Mardi Gras. Students can cast their ballots in the hallway of the Administration Building today, for their choices. Candidates for Queen are Mrs. Kathryn (Kay) Barlow and Elizabeth (Libby) Ward. Running for King honors are Dan (Swede) Backman and Dr. Archie (Socrates) Jones. Dr. Ralph Roske, the teaching staff's Georgie Jessel, will be master of ceremonies.

Another feature of the Mardi Gras will be prizes for best student costumes. It is reported that these prizes are priceless.

General Chairman Jim Mayo, who has been overseer for the preparations would like to thank the following people for helping in the preparations of the Mardi Gras: John Dufour, music; Jean Spadoni, refreshments; Pat Hammond, decorations; John Borel, John McCaddon and John Funk, planning and entertainment; and Joan Stempka and Angelo Lavagnino, Jr., publicity and ticket sales.

### AWS Dance Set Tomorrow Night

BY JOYCE WEAVER

Have you asked your favorite guy yet? You'd better get on the Merry-Go-Round, because there isn't much time left. "Million Dollar Merry-Go-Round," the Associated Women Students' girl ask boy dance, is tomorrow night.

This one-in-a-million dance will be held from 9 p. m. until 1 a. m. in the Home Economics building at Redwood Acres. Music for the evening will be by the popular Claude Gribble and his combo.

This gala affair is being sponsored by the Associated Women Students. The price for ASB card holders is only \$2, while it is \$2.50 for those without.

Patrons for the evening will include Mr. and Mrs. Edwin Caplan, Mr. and Mrs. Reese Bullen, Dr. and Mrs. Frank Wood, Dr. and Mrs. John B. Russell, Kate Buchanan, Mrs. Corbett and Mr. and Mrs. John Farr.

Fran Singleton is general chairman of the dance with Joanne Beer in charge of decorations; Gayle Allen, bids; Joyce Weaver, publicity; Marilee Ammer, refreshments and Kay Killenger, cleanup.

### Three Outstanding Men To Take Part In Annual Religious Emphasis Week

Three outstanding figures in the field of religion will take part in the sixth annual Religious Emphasis Week to be held March 20-22 on campus.

Rev. Harry Toler Woodard, pastor of the Roger Williams Baptist Church in Los Angeles will discuss the question "Are Spiritual Values and Education Compatible?" as one of the two main guest speakers during the week. Rev. Woodard is also student pastor on the University of Southern California campus.

Father Willis J. Egan, S. J., professor of religion at the University of San Francisco will address the group at the main Friday morning assembly. Father Egan is well-known as a speaker and is coach of the University of San Francisco debate team.

Coming from the University of California Campus, Berkeley, is the Rev. Otto A. Bremer, Lutheran campus pastor and executive director of the Lutheran Student Foundation of Northern California, who will lead a group discussion on "Religious Emphasis in a World of Isms."

In charge of the weeks program are Carol Molinder, chairman, Ruth Holmes, Virginia Wilson, Gordon McBride, Jim Shaver, John Funk, Shirley Christy. Faculty advisers are Richard Covington, Dr. K. I. Ingebritson, William Jackson, Miss Kate Buchanan, and Mrs. Clare Walton.

### Berry To Speak At Faculty Forum

Mr. Glenn Berry, instructor in art, will speak on "The Function of Art" at the Tuesday, March 19, Faculty Forum at 8 p. m. in the Wildlife Building. Slides will be shown to illustrate the talk. Admission is free and the public is invited.

By tracing the esthetic attitudes of art through history he will give a bases of judgement on contemporary art.

"Art," says Mr. Berry, "expresses the attitude of the society in which it exists. There is subjectivity during times of materialistic dominance."

In between the periods of objectivity and subjectivity there are periods of transition when the artists' interest is mainly on the form and the paint itself. Cubism is a recent equivalent of this in that it is an analysis of form rather than symbolic meaning.

He believes that we seem to be returning to subjectivity, after emerging from objectivity of the Renaissance and going through the period of form analysis.

There have been several showings of Mr. Berry's pictures throughout the country, and there will be a display of his work in the Humboldt State College gallery from April 29 to May 4.

### "Inside" Pages Produced By CU

This being Conservation Week, pages three, four, five and part of six of this issue of the Lumberjack have been turned over to Conservation Unlimited, campus conservation club.

CU member in charge of those pages is Dick Laursen, senior Fisheries major. Copy for the special pages was turned in by Dr. Ray Dasmann, Dr. Ernest Salo, Mr. Fred Telonic, Mrs. Myrtle McKittrick, Reed Sanderson, Wayne Salmon, Jim Vaughn, Rich Wheeler, Jim Adams, Otis Skaggs, Bill Pogue, Jack Legate, Pat Hutchens and Dick Laursen.

### ANDERSON AT SPEAK AT ANNUAL AFFAIR

Climaxing the eighth annual Conservation Week on the Humboldt State College campus will be Saturday night's banquet and dance at the Eureka Inn.

Guest speaker for the banquet will be Carl Anderson, co-ordinator of the Redwood Region State Parks, who will discuss how conservation concerns the public today. Mr. Anderson has been with the parks for the past decade and has worked with people and conservation as it affects the people, according to Salmon.

Wildlife and game management students of Conservation Unlimited have scheduled a week of exhibits and programs from March 11 through March 16 under the chairmanship of Wayne Salmon.

The dinner-dance will be held at 7:30 p. m. Saturday, March 16 and the public is cordially invited to attend. Tickets are \$2.50 and may be purchased at the door. Music will be provided by the Lowell Round Combo.

### FOUR SOPHOMORES ELECTED TO OFFICE

Four sophomore class offices were filled in the run-off elections held Wednesday, March 5. Ed Spencer, president, will continue on in this office for the remainder of the semester.

Those just elected to fill the other offices were Ben Zlataroff, vice-president; JoAnne DeFino, secretary; Evelyn Horn, treasurer; and Art Dalaines, Inter-Club Senate representative.

This special election was necessary as previous officers had to drop school or had other matters that kept them from fulfilling their duties as officers.

### CSTA To Hold Meeting Monday

The Humboldt State College club of the California Student Teachers Association and Phi Delta Kappa will hold a panel discussion on the California Education Clubs at a joint meeting to be held at Redwood Park, Monday, March 18, starting at 8 p. m.

On March 23, the Northern section of CSTA will hold a meeting on the University of California campus at Berkeley, California.

### Forensics Squad Receives Four Awards For Excellence In Pepperdine Debate

HSC's varsity forensic squad returned early this week from the Pepperdine College Spring Debate tournament with four awards for excellence in seeded debate competition. Two teams, one in men's competition, the other in women's division earned the award.

The team of Freda Wood and Kay Carlson repeating their earlier showing in the JV tournament at Stockton College bit this time took the measure of teams from Los Angeles City College and San Diego State College. The new pairing of Jim Shaver and Jim Arnot also achieved a tournament rating of "excellent" against teams from southern California and Utah.

The Lumberjack forensic entry which traveled to Linfield did not fare quite as well. While giving debate teams from Oregon State College and Washington State College a battle in the varsity events, the HSC speakers were edged out of making the final rounds where awards were made.

The complete summary of Linfield ranking are being awaited so that the complete individual scores can be released.

The next job to which the forensic squad now turns is the co-sponsorship with the HSC chapter of Pi Kappa Delta of the First Annual North Coast Redwood Forensic Tournament for high schools. This event is scheduled for Saturday, March 23, on the college campus. To date six high schools from Humboldt and Del Norte counties have indicated an intention to participate. HSC student speakers and faculty will judge the competing high school students in debate, extemporaneous speaking, oratory and oral interpretation.

## Do You Know 'Why'?

If someone asked you why are you here, what is your purpose on earth, or why are you alive, what would you say? This question of "why" is a bothersome one, and men have pondered it for centuries. Do you have an answer for "why", an answer that explains ALL of the observed facts? If you do not, or if you aren't completely satisfied with the answer you have, take some time off from the texts in the near future and search your mind. You owe it to yourself to at least know why you exist. Are you completely satisfied to believe that you are a biological phenomenon and nothing more? If this is true, if we are only complex biological phenomena, then the very philosophy on which our nation is founded is the senseless babbling of foolish men. The principles our brothers and fathers died for do not exist.

Thomas Jefferson wrote that this is a nation made up of individuals endowed by their creator with certain inalienable rights. Was he just a senile old man who was rather irresponsible with his thoughts or did his words echo the universal truth? Most Americans will agree with Thomas Jefferson that we are created or moral worth, rather than children of randomness. Unfortunately, most of us merely agree and refuse to carry this belief to its logical conclusion.

If then, this is the case, if we have been created by a superior being, what is our relationship to Him, what is this relationship to us? Should we ignore Him, does He ignore us? Hardly! Which one of us would start a business and then abandon it or expect no profits? Which one of us would leave our children to fend for themselves?

What part, then, should God play in your life as a college student; what part DOES he play? From this point on, then, you must pursue the question yourself. What role do you play in God's world, what role does he play in your life? This is probably the most important question of your life, but YOUR answer is even more important

—Gordon McBride

## Minutes of the Student Council

**MARCH 7, 1957**

The meeting was called to order by President Mike Fielding on the above date. Those present were Joe Chappelle, Jim Barnes, Hank Cooper, Chip Brodie, Don Peterson, Pat Duffy, Sandi Wahlund, Jack Sears, Dr. Karshner and Roberta Johnson.

The minutes were approved as submitted.

### CORRESPONDENCE

A thank you note was read from Jim Kidder, the guest speaker from University of California

for the Leadership Conference. A letter was read from Cliff Aronson informing the council that the Cal Tjader Quintette will be available during the month of April.

### OLD BUSINESS

It was reported that Jerry Moore's Combo has been contacted to play for the Del Norte High School.

ICS has not taken an action on the letter received from the Kappa Sigma Kappa Fraternity.

## Presenting Your Cooper, Peterson, Barnes Spotligthed Student Body Officers

This is the second in a series on the Associated Student Body Officers. Next week the secretary and treasurer will be featured.

BY JOYCE WEAVER

Hank Cooper was chosen as Awards Commissioner in the last general election. Cooper is a senior majoring in Physical Education.

"Hank has been very active in Executive Council work. He has served on many committees pertaining to awards and also on committees of general interest to the Associated Student," says Mike Fielding, ASB president.

As awards commissioner Cooper has several duties. Some of them are to attend the meeting of the Executive Council as a voting member; to formulate and submit drafts of policies pertaining to the presentation of awards to the Executive Council for consideration; to keep a ledger listing and identifying the various trophies and awards; and to set the time of the awards assemblies with the cooperation of the assembly committee. One assembly should be held after the football season, and one general awards assembly should be held at the end of the spring semester.

Cooper is the student representative to the athletic advisory board. This board is a very important co-ordinating body between the athletic program and the students in regards to their wants and needs.

Athletics have been a very important part of Cooper's college life. He has been on the football, basketball and track teams. At present he is president of the Block H society.

Last year he was chosen Popera King and was elected into the Green Key society last semester. The office of awards commissioner will be open for nominations in the ASB elections April 24.

\*\*\*

Activities Commissioner, Jim Barnes, has been very active in student government affairs and social activities here at HSC. He is a junior majoring in optometry.

Barnes' duties as activities commissioner are to preside over all meetings of the Inter-Club Senate and to serve as a liaison officer between the Senate and the Student Executive Council; to attend all meetings of the Executive Council as a voting member; and to co-ordinate student activities by working with the Executive Council, the Dean of Activities and the student club representatives in the Inter-Club Senate.

One of the biggest jobs that Barnes has to do is to promote co-operation between the clubs on campus through the activities of ICS.

Mike Fielding, ASB president, says that, "Jim has done an outstanding job in co-ordination between the Executive Council and ICS. He has done a good job of boosting and strengthening the important organization of ICS on campus."

It is also part of the activities commissioner's job to keep up the social activities calendar and to take care of any business out of Executive Council having to do with ICS relations or activities.

Barnes is, at present, vice-president of the Junior Class and a member of the Inter-Collegiate Knights. He has worked on frosh camp and was just recently elected into Green Key.

The activities commissioner is chosen by student ballot in the general election. This is just one of the offices that will be open for the elections of April 24.

\*\*\*

Don Peterson was just recently appointed Assemblies Commissioner. The office of Assemblies Commissioner is itself a newly established commissioner position. It was established when the students approved the revision of the Constitution.

The position of Assemblies Commissioner is very important in the assemblies program continually needs expansion and it

HANK COOPER  
Awards Commissioner

JIM BARNES  
Activities Commissioner

DON PETERSON  
Assemblies Commissioner

can be strengthened by good and varied assemblies.

Peterson has been active as a member of the band, working on frosh camp and as a representative of ICS. He was also president of the Freshman Class.

"This is a very important position," says Peterson, "bringing good entertainment and educational programs to the school. I'm going to try my hardest to do a good job as Assemblies Commissioner."

(Continued on Page Eight)

## The Inquiring Reporter

**QUESTION:** Has our active conservation program on campus made you more aware of the need to use our natural resources wisely?

**ANITA PECCHIA**, Junior, General Education major. "Yes, it has. It's just logical that such a program would."

**BOB CUTTING**, Senior, Music major. "No, I had not been aware of the program but the past week has helped."

**JOHN BEGNAN**, Sophomore, English major. "I didn't know there was such a program."

**PAT HAMMOND**, Senior English major. "Yes, however I think the mud slide on our front hill has not helped my understanding of conservation."

**ROBERT STANKUS**, Senior, English major. "Is there a conservation program on campus?"

**CLAUDINE RAY**, Freshman Music major. "Yes, because it has brought the problem to the surface. It has made people aware that we need conservation and what to do about."

## Popera Scheduled For March 29

"Classical Music for Those Who Hate Classical Music" is again the theme for the popular Humboldt State College Popera to be held Friday night, March 29 in the Eureka Municipal Auditorium.

Bob Cutting, chairman for the seventh annual Popera, announced this week that plans for the event are well underway and that the candidates for "King of the Popera" will soon be announced.

An hour's program of music by the college orchestra, band, chorus and choir will be followed by an evening of dancing. James T. Mearns of the college music department will act as master of ceremonies.

The Popera was conceived seven years ago by the Humboldt State College music department in conjunction with the musicians' union for the purpose of aiding and benefiting the music program. According to Leland Barlow, chairman of the division of fine and applied arts, proceeds go into the emergency fund of the music department to provide for incidentals not covered by state funds.

A goat who apparently craved a college education was found strolling leisurely in HSC's halls in 1933. He also nibbled a little grass and stood by the library window, observing the students, no doubt.

# Conservation News And Coverage

## J. J. Krohn Sparked Humboldt State Game Management And Conservation Program

J. J. Krohn, or "Pete" as he is known to his closest associates, will always be remembered as the person who provided the spark which ignited the pyrotechnics that speeded the development of the Humboldt State College Game Management and Conservation Program. In 1940, Krohn interested President Arthur S.

Gist in the idea of building a wildlife management program designed to train boys for work primarily as game wardens, fish hatchery technicians and assistant game managers around the nucleus of a course which had been organized a year earlier in Hatchery Biology by Mrs. William M. Lanphere. The burning enthusiasm of the present Division of the Natural Resources Staff, the members of Conservation Unlimited, and of all those individuals who have had contact or been associated with the HSC Wildlife Program is a clear testimonial to the fact that the fireworks started by Krohn in 1940 are far from burned out.

Krohn came to Arcata in 1903 as manager of the California Barrel Company and remained in that capacity until his retirement about a year ago. His wide range of interests and public spiritedness are well known to his intimate friends and best illustrated for others by a mention of some of the activities he has engaged in during his years in Arcata. Krohn was a member of the original Humboldt State College Improvement Association which was the forerunner of the present College Advisory Board. He is a past-president of the Arcata Chamber of Commerce and of the Arcata Rotary. Incidentally, he is planning to attend the Rotary International Convention in Lucerne, Switzerland, late this spring. J. J. has been a member of the Masonic Lodge for over fifty years, has been active in Boy Scout work, and has served many years as a director for the California State AAA. He has also been very active in local fish and game clubs and served as president of the Redwood Area Council of Fish and Game Clubs.

J. J.'s interest in wildlife and conservation is based in the fact that he has been an active sportsman for the greater part of his life. His favorite sports have been waterfowl and upland game hunting and fishing. Between 1927 and 1954 he maintained a summer home at Klamath Glen where his numerous friends were entertained and taken on trips up the Klamath River. During the early part of this period a 30-mile stretch of the River could only be reached by hiking or by boat. Krohn owned a 26-foot redwood log "dugout" or canoe type of power boat which he skippered up and down the River over the riffles. On these trips he regularly ferried his friends to some of the choicest fly fish-

J. J. KROHN

## Carl Anderson To Speak At Banquet Tomorrow

Mr. Carl A. Anderson, Coordinator-Supervisor of the Redwood State Parks, will be the guest speaker at Conservation Unlimited's Eighth Annual Conservation Banquet to be held at the Eureka Inn on March 16, 7:30 p.m. Tickets at \$2.50 each will be on sale at the door.

Mr. Anderson has had 10 years experience in the field of Conservation as related to public recreation. He is well aware of the problems involved in supervising and maintaining areas of recreation for the ever increasing number of tourists that take to the highways each summer in California. He has pioneered the development of State lands for recreational use. He has passed on to many others the concepts of conservation that play a major role in his every day life. Being an ardent sportsman himself, he seldom passes up a chance to wet a line or step into the bush.

In 1947, after spending three years in the Navy as a pilot, Mr. Anderson joined civilian life and the California Division of Beaches and Parks. His first assignment as a park ranger was at Cuyamaca Rancho State Monument near San Diego. His next assignments were at Mt. San Jacinto and then Doheny Beach State Parks, also in southern California.

In 1951 he became the Assistant Supervisor of Richardson's Grove State Park. After one year there, he became the Supervisor of Patrick's Point State Park, a position he held for three years. Mr. Anderson left Patrick's Point in 1955 to become the Coordinator-Supervisor of the Redwood Region State Parks and is currently stationed in Weott.

Mr. Anderson will utilize his background of experience in public work for his talk at the banquet Saturday night.

ing riffles on the Klamath River. J. J. is an excellent performer with a fly rod and rates as a "purist". At the end of a day's fishing with his favorite fly patterns - Blue Bottle, Joe O'Donnell, Charlie's Delight, Railbird and, as a last resort, the Dusty Miller - J. J. usually topped the list of fishermen in his group both in number and size of catch.

Since his retirement, Krohn has spent a considerable amount of time traveling with Mrs. Krohn. His daughter, Mrs. Georgie Hitt and son, Harry Krohn reside in Arcata.

## 'Near Completion' Stage Ascribed To Wildlife Plant

BY R. F. DASMANN

The new wildlife plant at Humboldt State College is at present in that long-continuing stage known as "nearing completion." The contractors, construction crews and heavy equipment have moved on to bigger things, but many minor jobs need to be finished before the entire plant will be in operation.

The wildlife building proper was completed in the fall semester of 1955 and occupied at that time. It is serving for the present, however, as a Natural Resources building, housing Game Management, Fisheries, Forestry and Agriculture. The reading room and audiovisual room are serving as forestry offices and classroom; the exhibit room as yet houses no exhibits. Current plans call for the construction of a new row of offices underneath the existing faculty offices. Construction of the proposed Forestry building will ease some of the pressure on the present building. However, rumor has it that a new wildlife building is being considered, to accommodate the greatly increased enrollment expected by 1970.

The fish hatchery, game bird pens and fur shed will probably not go into operation until the fall of 1957, at which time additional graduate assistants will be hired to assist in the operation of the game installations, and a full-time hatchery man to operate the hatchery.

It seems safe to forecast, considering the steadily increasing enrollment at Humboldt State, that change will continue in both the curriculum and the physical plant.

## What Is Conservation?

BY DICK LAURSEN

Many people believe that conservation and preservation are synonymous terms. Though the terms are somewhat similar the connotation of each is much different. To preserve is to save from decay, to not change appearance, to maintain intact and unimpaired. Conservation, on the other hand, is the preservation of natural resources for economic use, so as to secure the greatest good to the greatest number. The word that differentiates the two terms is "use." Conservation is "wise use." "Wise use" or "use without waste" is the key to the basic principle of conservation.

Hardly five years ago about 75 per cent of the American people if asked "What is Conservation?" would have answered that it is saving our forests. Since that time much publicity has been broadcast advocating conservation of each of our natural resources and many different "saving" answers could be heard.

We cannot lock up any of our resources and say we are conservationists — preservationists perhaps, but not conservationists. For example, what good is soil to mankind (or animal life) if it does not grow plants of some species which may or may not benefit us directly? Soil, though barren, may act as a lid keeping the solar radiance from evaporating water from deep within the earth and thereby lowering the watertable in that area. In both cases the soil is being used. You could preserve the soil by putting it in a box and locking it in a vault, but this would not be "wise use" of our resources.

If we think of conservation as "wise use" of natural resources, we must also think of conservation as "wise use" of time, energy, effort and money.

(continued on page 6)

Carol Leach, junior Home Ec major, watches the fish in the aquarium which is one of the exhibits presented by Conservation Unlimited and the Forestry Club in the foyer of the Administration Building during Conservation Week.

## Wildlife-Fisheries Easter Field Trip To Combine Education And Pleasure

BY JACK LEGATE

Combining education with pleasure is fine if you have the chance to. Here at HSC where we get an education in the midst of a wonderful recreation area, we also have a chance to turn an Easter vacation into a profitable and enjoyable week in some other section of California and/or Oregon.

The lucky persons I'm talking about are the boys that sign-up for Wm126 — the wildlife-fisheries field trip. One unit of credit is given if the person wants to sign-up for it. Talk about enjoying school-work! These boys do. The entire trip is a whirlwind affair with invaluable contacts and information gained every day. Many professional wildlife men are met that are willing to share their experiences with these students that are just coming up. Each student frantically writes notes to help him remember what is being said.

Those HSC students that have gone on these trips before can tell you how much they got out of them. Some have used the trips to find places they would like to work. Others want to broaden their knowledge of wildlife in different areas. Some like to go along just for the scenery, but all enjoy the fellowship of the group.

Last year about 13 Humboldt students made the trip. We spent about six days in the field, traveling the first day from here to Red Bluff. We visited deer ranges on both sides of the Sacramento Valley the next day. Following another night in Red Bluff we took off for Darrah Springs Trout Hatchery. From the hatchery we travelled near the edge of Lassen National Park (where we had a big snowball fight) and on to Honey Lake Waterfowl Management Area near Susanville, where we spent a day and a half viewing waterfowl, antelope and sage hens. From there we headed into Oregon where we visited the country around Plush, Oregon, where Jim Yoakum, 1954 HSC wildlife grad, was working with antelope for his Master's degree in Game Management.

You may now think that this is mighty easy for a full unit of credit, but you do have to write a theme on the content of the trip — at least the educational part of it. This helps cement the experiences in the mind.

Would you, too, like to be in on one of these trips? You don't have to be a fisheries or wildlife

major to make it. An interested student can be benefited by taking the time to go along, for credit or not. Dr. Ernest Salo or Dr. Richard Genelly are the faculty members that should be contacted if you want to go.

This year's trip is in the planning stage at the present time, but one thing for sure, if it is like any of the others, it'll be a real "humdinger."

## THE SECRET

Where there are beautiful trees is a beautiful land. But only so long as the trees may stand. The streams and trees are a marvelous team. But with the trees you ruin the stream.

A glorious fish is the rainbow trout. But only so long as the fish is about. The stream and fish are a marvelous team. But you'll have no fish without a stream.

A wonderful sight the land all green. But it takes a team to make the scene. Remember the trees to save the stream. This is the secret of life's beauty theme.

—Pat Tomlinson

## CU ACTIVITIES IN REVIEW

SPRING 1956

BY JIM ADAMS

The Seventh Annual Conservation Banquet of 1956 featured Mr. Fred Jones of the California Department of Fish and Game. His topic, "Conservation Depends on Cooperation," was heard by more than 150 guests.

Conservation Education activities were continued as in the past years. Many of the schools and clubs are asking for repeat showings of the various slides and movies.

The clambake was attended by the usual clams, some of whom became slightly unhinged. Dick Laursen proved to be the biggest clam of the lot, and walked off with the Liar's Belt.

Spring Social featured a wildlife movie, followed by a dance.

The Poop Sheet, official news organ of CU, was distributed to new students and old grads alike, keeping them informed of school and club activities. Former students in the Armed Forces as well as grads are on the mailing list.

The CU Spring Picnic was again held at Patrick's Point, with a jolly good time by all.

FALL 1956

The football concessions, which provide money for club activities, were managed by the members with a dexterity increasing with the years.

The Annual Barbeque, canopied by the usual wet grey skies of Redwood Park, provided meat in varying hues for the wildlifers and their friends. Log chopping contests, packboard relay races, and casting contests entertained all except the participants.

SPRING 1957

The CU House was finished in time for the first club meeting of the semester. Club members donated their time and effort in rehabilitating the house.

A crabfeed, precipitated by an unusually low price on the tasty decapods, served as an introduction to a new school year for many members.

CU endorsed Senate Bill No. 666, designed to keep our scenic highways free of obtrusive billboards.

A Rancher Opinion Survey was started this month to poll various ranchers on their attitudes towards deer management.

The Eighth Annual Conservation Banquet will be held at the Eureka Inn, attended by sportsmen, fish and game officials, and conservationists. Mr. Carl Anderson, a long-time executive in the State Park system, will speak on "how conservation concerns the public."

## WILDLIFE PROGRAM

BY JIM VAUGHN

The wildlife program began in the spring of 1940 with a course in Hatchery Biology, taught by Mrs. Hortense Lanphere. The following year, J. J. Krohn, a prominent Arcata businessman and sportsman, persuaded Arthur Gist, then president of the college, to introduce a game bird management course. Mr. Krohn, with the help of the Humboldt County Board of Supervisors, the State Division of Fish and Game, the Redwood Sportsman's Association and the Works Progress Administration, obtained game birds, rearing pens and operating expenses for such a course.

In the spring of 1941, the first courses in Principles of Wildlife Management, Conservation of Natural Resources, and Game Bird Management were offered, taught by Fred Telonicher. A course in Game Bird Diseases was added in the fall.

END OF WAR

Until the end of the war, the wildlife program was a two year course, designed to meet the needs of fish culturists, game bird breeders, conservationists, and game wardens. In 1946 however, John H. Lewis, the founder of Conservation Unlimited, was added as a full time instructor, and the program was elevated to a four year course leading to an AB in Wildlife Management. In 1949, a four year program in Fisheries was started with the addition of John W. DeWitt as a full time Fisheries instructor. The first annual Conservation Banquet was held in December. The first plans for a new wildlife management building were discussed at this time. The next year, Fred A. Glover was appointed to occupy the vacancy left by the death of John Lewis. The same year majors in Fisheries and Wildlife Management were revised to carry Bachelor of Science designation. The first floor plans for the new building were prepared. County funds were obtained for the operation of the fish hatchery, and a bird banding program was inaugurated by the college.

YOCOM REPLACES GLOVER

In 1953, Dr. Charles F. Yocom replaced Dr. Glover to head the wildlife program. The State Legislature appropriated \$485,000 for the new building, and a major in Conservation Education was offered, leading to a Secondary Credential.

In the next three years, rapid changes were made in the instructional staff and facilities of the program. Mr. DeWitt took a leave to complete his doctoral studies and was replaced by Dr. Ernest Salo. Dr. Raymond Dasmann was added to the Game Management staff. In 1954 Dr. George Allen in Fisheries and Dr. Richard Genelly in Game became members of the department. Dr. Mark Rhea and Mr. Edwin Pierson, followed by Mr. Jerry Partain, were added to the newly-formed curricula in Forestry-Lumbering and Agriculture.

OPENED IN 1955

The construction of the wildlife building, first discussed in 1948, actually started in 1954, and was opened with an impressive ceremony in the fall of 1955. This marked the beginning of a new phase in the wildlife program. In July, 1956, the Division of Natural Resources was established, to include Game Management, Fisheries, Forestry, Agriculture and Conservation Education Majors. Dr. Charles Yocom was named head of this division. A graduate division in Game Management and Fisheries was instigated at the same time, offering a Master of Science degree.

From the first class of 12 students in 1940 to the present enrollment of more than 150, the wildlife program has shown steady growth, and has kept pace with the technological advances in the various fields of conservation.

## FRED TELONICHER'S TEACHING CAREER AT HUMBOLDT BEGAN IN FALL OF 1927

Mr. Fred Telonicher, professor of zoology, came to Humboldt State College in the fall of 1927. He was a graduate of Fresno State College where he had been a basketball star. His first position at HSC was a member of the staff in physical education. He coached athletics here for several years. During the 1936-37 basketball season, he coached a winning team over San Jose State College. In 1938 he became Assistant Professor of Biological Science.

Introduction of courses in Wildlife Management was in the planning stage in 1940 and in the spring of 1941 the program was launched with Mr. Telonicher teaching a course in Game Bird management. This was in addition to teaching his full load of other classes. In the fall a course in Game Bird Diseases was added.

In these first years Mr. Telonicher gave unselfishly of his time and efforts to produce adequate instruction for the students enrolled in these courses. After teaching his regular classes, he taught the Game Bird classes, then he would go home and work with the young pheasant chicks that he had hatched in an incubator in his basement.

ACTIVE PARTICIPANT

He always took an active part in any of these early activities. He spoke to sportsmen, mobilized their financial assistance, studied the care and propagation of game birds and worked with the California Department of Fish and Game in organizing the program in its practical aspects - all in addition to a full-time teaching assignment (and in those days teaching assignments were heavier than they are today!). Moreover, it was due to the efforts of Mr. Telonicher and Dr. and Mrs. Lanphere that the program was established at a really high level so that from the first, graduates even of the two-year program were able to succeed well in the field. Mr. Telonicher worked with the Department of Fish and Game in placing his students then, although it was soon recognized that the two-year program was inadequate and should be converted into a four-year program as soon as enrollment warranted and made possible the employment of a specialist in the Wildlife Management field.

WAR YEARS

During the war years the enrollment, which was small to start with, dwindled to near nothing, but Mr. Telonicher continued to teach a course in Wildlife Management each semester - taught in addition to his normal program - in order to keep the curriculum alive. He taught these courses till 1946 and the coming of Mr. John Lewis, the first full-time Wildlife professor.

Although Mr. Telonicher no longer teaches courses in Game Management, the Fisheries and Game Management majors continue even now to take part of their basic science work as well as most all of their upper division courses in Zoology from him. Hence, he has maintained active participation in the developing program. No member of the col-

FRED TELONICHER

lege staff has derived more satisfaction from watching the growth of the program, and particularly the construction of the new Wildlife Management plant with its superb facilities than Fred Telonicher who extended the same meticulous care to both birds and boys under his supervision in the early days of Wildlife at Humboldt State College.

The Great Seal of California, adopted in 1849, has 31 stars in the ring to denote California was the 31st State admitted to the Union.

## CLUB OF THE WEEK

The purpose of the Forestry Club of Humboldt State College is to further students education in the field of forestry and also to create a fellowship among its members. Chief Forester, Dave Flohr; Assistant Chief Forester, Dean Jennings; Secretary Forester, Neil Babcock; Fiscal Forester, Bob Archibald; Whistle Punk or Sergeant at Arms, Doug Fisher and I. C. S. Representative, Jim Winfrey have been trying to fulfill the club purpose in every way possible. Forestry Club advisers Ed Pierson and Jerry Portain have been of great assistance in the welfare of the organization.

The Forestry Club has been quite active over this past year in the field of forestry and lumbering. The club has participated in activities such as tree planting, tree measurements and selling Christmas trees during the holiday season.

This spring the club has planned several trips to their cabin in Six Rivers National Forest near Salyer. This cabin was acquired from the U. S. Forest Service last spring. It is to be used for storage of equipment and overnight lodging by the Forestry Club members when they are on tree planting, tree thinning or recreational trips. The club is also planning activities during Conservation Week as well as a barbecue in the near future.

Membership in the Forestry Club is open to the entire student body and those interested in forestry, agriculture or related subjects are especially invited to join this organization.

## LAURSEN WINS FISHING CONTEST

"King Killer" Dick Laursen has taken first place in the steelhead fishing contest for the second year in a row. Dick's winning fish was a 15 pound buck, caught in the South Fork of the Smith River. Second prize went to Wayne Salmon who caught a 12½ pound buck in the South Fork of the Eel River.

Even though Wayne was beaten in the steelhead contest, he made up for it in the salmon contest which was held in the fall. Wayne took an 18 pound female

from the Mad River to take first place. Due to a scarcity of entries no second prize was given.

### ROOM 116

Room 116 in the Administration building used to be the first grade room of the College Elementary School before the latter was moved into the present building. In 1933 plans were made for 116 to be converted into a regularly equipped science lecture room.

## Carol Finley Adds Feminine Touch To Wildlife

Thanks to Carol Finley, the Wildlife Department at Humboldt State now has the feminine touch. Carol Finley, a junior transfer from East Contra Costa Jr. College, is the only girl majoring in Wildlife Management at HSC.

Carol came to Humboldt last semester because she likes small colleges and because she wanted to major in Wildlife Management. After graduation Carol hopes to become a Federal or State Civil Research worker.

Carol says she doesn't really know why she decided to choose Wildlife Management as a major, other than that she has always lived in a rural area and most of her family are interested in outdoor life. Carol also said that while she was in high school she was always very interested in Biological Sciences.

Carol has a well rounded outlook on life as far as hobbies are concerned. She likes to draw or paint outdoor scenes and collects everything from sea shells to stamps. In her spare time if you don't see Carol horseback riding (continued on page 6)

By DICK LAURSEN

**CONSERVATION WEEK!** This week has been set aside as Conservation Week on the Humboldt State campus by special proclamation of President Siemens. For just one week we should let conservation, the wise use of resources, take precedence in our lives. Have you been conservative in some way during the week? There is still time to get into the act.

The wildlife boys have certainly outdone themselves this year with the exhibits displayed in the foyer of the Administration Building. Don Way and his committee; Wayne Salmon, Brad Van Scriver, Lloyd Clark, Jack Zaiger and Dave Patterson, are to be complimented on the fine display. Bob Ringo should get special credit for making the posters used in the displays.

Freshwater Lagoon was the target for 75,000 fingerling rainbows on March 6. These fish were brought over from Shasta Hatchery in a tank truck. Last year Freshwater Lagoon received 75,000 fingerlings by an aerial planting. These plantings should

provide some good angling in the near future. There is no adequate spawning stream entering the lagoon and therefore the plantings are necessary.

Maple Creek, which enters Big Lagoon, will receive some 30,000 cutthroat fingerlings in the near future. The stream has recently been cleared of debris by the logging operators in the area and it is hoped that the fish from this planting will take up residence in the newly reclaimed stream.

A proposal to open the Klamath River from its mouth to the confluence of the Shasta River has been accepted by the Fish and game Commission and will take effect on April 1, 1957. This means that some fine steelhead fishing will be made available during a time when almost all other waters are closed.

Flash! Reports have come into the local sporting goods stores that some King Salmon have been taken off Trinidad Head just before the storm hit early this week. If the sea calms down to a mild roll, it might pay to investigate the situation. Ocean salmon are hard to beat.

## A TRIBUTE TO JOHN H. LEWIS

JOHN H. LEWIS  
CONSERVATIONIST

HE STILL LIVES IN PEOPLE  
MADE BETTER BECAUSE HE  
LIVED — SO TO LIVE IS NOT  
TO DIE.

The first wildlife professor at Humboldt State College was the late John Lewis. He arrived at HSC in the fall of 1946 from Oregon State College and taught Animal Classifications, Economic Mammology, Ornithology, Conservation of Wildlife and Principles of Wildlife Management. Professor Lewis was an excellent leader and soon had many people in the community interested in his work at the college. He planned curricula and taught overtime without monetary compensation. He was the organizer and first adviser of Conservation Unlimited, campus conservation club. In the Fall of 1949 this fine leader was fatally injured in a highway accident.

In 1952 Conservation Unlimited asked the college if they might have the small piece of property at the north end of the parking lot in front of the Coop on which to build a memorial to Mr. Lewis. Many work parties turned out before the area took shape and emerged into the beautiful memorial it is today. Honorary C.U. member Mr. Bill Johnson, head of maintenance, and his staff contributed greatly to the erecting of this tribute to a great person.

Early in the fall of 1955 the memorial was completed and on Oct. 27 it was officially dedicated and given to the college by C. U. President Bruce Wyatt. Mr. Fred Telonicher, professor of zoology, and Dr. Homer Balabanis, dean of instruction, gave dedication speeches. In these speeches, the value of Mr. Lewis' work here at HSC was revealed to the students attending the dedication ceremonies. It was revealed that through the persistent efforts of Mr. Lewis the Wildlife Program at HSC was developed from the nucleus started by Mrs. Hortense Lanphere, Mr. J. J. Krohn and Professor Fred Telonicher, into essentially the program we have today.

The "wildlifery" at HSC have reason to be proud of such a man and have shown their gratitude by erecting this fine memorial to Mr. John Lewis, Conservationist.

Pearl Degenhart, head of the art department at AUHS, poses beside one of her paintings on display in the audio-visual room. The exhibit ends today.

## Humboldt State Cannot Avoid Becoming Involved In 'Sectional' Water Issue

BY ERNEST SALO

The leading natural resource in northern California is water. Consequently, Humboldt State College finds itself in a situation where it cannot avoid becoming involved either in the studies of the properties of water or in the advising of the disposition of this resource. Sectional interest appears to be inescapably bound up with the question of California's water resources. We have what Southern California wants, demands, and apparently is going to get, either by contractual sanctity or otherwise.

Our water resources are of the type that whenever water demands are made, fish populations are affected. Fortunately, the true value of these fish populations is being realized before the thirst of Southern California has sucked all the water from our rivers. Water impoundments, whether built by private, state, or federal agencies, are inevitable; consequently, the management of the fish populations in these impoundments must keep pace with these engineering feats. Specialists will be in great demand for the study and management of these commercially and

recreationally important resources.

Northern California is in the transition or overlapping zone of marine fisheries. Locally and to the north, we have the salmon and halibut fisheries, and to the south, the important tuna and sardine fisheries. The study of physical and chemical oceanography is inescapably tied up with the study of the populations of these fishes, and once again Humboldt State College is in a unique position, geographically and otherwise, to offer services in regard to these studies. It is obvious why we attract students from both the north and the south and why all regions of California are represented in the fisheries student body.

## Carol Finley

(Continued from Page One)

or hiking, you can find her at Sigma House, where she lives, reading an interesting novel.

Although Carol had the misfortune of being in the hospital with a broken leg last semester she still managed to keep up with her school work and maintain high grades.

While at HSC Carol has been active in College Y. for which she was corresponding secretary, and is now on the Jr.-Sr. Prom Committee.

Carol feels that Humboldt State has a terrific Wildlife Department, but that more girls should take advantage of the curricular offered by majoring in Wildlife Management.

## Conservation

(Continued from page 3)

Conservation is practised in the home by most people. In this location the term conservation is called "being thrifty" or "conservative." If a housewife purchases two pounds of bacon and uses only one pound and the other spoils before she uses it, she is not a thrifty housekeeper. She has not practiced conservation.

Another interpretation of conservation is to be frugal, which is to say, be economical or our resources. No nation ever succeeded very long if its people did not practice frugality. A nation is only as strong as its resources. To practice conservation is to practice thrift, frugality and "wise use" of our natural and God-given resources.

## Pearl Degenhart Enters New Field

BY EDDIE KEENAN

Miss Pearl Degenhart, head of the Arcata Union High School art department, has entered a completely new field of endeavor in her paintings of teen-age life and times. The theme of this segment of her work is based on her vast knowledge of the particular subject matter at hand. Her work is nationally recognized and many of her pupils have excelled in competition during the past years.

Those who have seen the display in the audio-visual room of the library, which ends today, will agree, I'm sure, that the subject matter is of definite interest to anyone in the field of education as well as to the teen-agers themselves. I would also like to call attention to the brilliant use of color and the relation of the forms she has used in achieving her purpose.

## 'Humboldt 57' Presented Tuesdays

The television show "Humboldt 57" can now be viewed on KJEM TV every Tuesday afternoon, 4:15 to 4:30 p.m.

"Humboldt 57" is produced by the Humboldt State College radio workshop students under the direction of Dr. William Ladd.

The show consists of three segments of public interest: the news of Humboldt State College given by Larry Heise, the social events on the campus by Pat Hutchens and the sports cast announced by Mike Stone.

Mike Stone is also the student production manager; Gary Mead, student director, St. Clair Adams, announcer and Joyce Weaver, script writer.

Dr. Ladd feels that a television show of this type is a benefiting experience for all the radio workshop students, as well as an interest of the public.

## The Tree Farm & Conservation

BY DAVE FLOHR

To some people "conservation" means the preservation of natural resources. To others it means much more. Conservation is use, wise use, or use without impairment. We have learned how we can use our water resources and still have them. Three other basic forest "crops" that we use without impairment are wildlife, forage and recreation. The same is true of trees.

Many people have misunderstood the basic purposes of forestry. They have felt that the use of forest products like lumber should be curtailed. They have said "the wealth of the forest must be preserved." Modern forest management shows that the wealth of the forest must be maintained and used — its timber as well as water, recreation, wildlife and grazing.

One of the most significant contributions to forest management since the turn of the century has been the industry-sponsored "tree farm" program. The term "tree farm" came into being from the fact that trees grow and mature like any crop. Trees respond to protection and care as does any farm crop. The tree farm program, therefore, represents planned forestry action to grow crops of trees on private lands. Similar programs are being carried out on National and State forests.

Tree farming is a practical effort that brings a system of forest practices right into the woods. It is more than protection, more than planting, more than making the woods neat and attractive. It is a business venture that is making wise use of our forests and thus inducing the ideals of conservation. Tree farming is the dedication to the philosophy of putting a stand of timber under a continuous production basis.

ADVERTISEMENT

## Campus Spotlight

BY JEWELL

A new name, a new face and a little new "gossip" and we're back in business . . .

In the midst of last week's heaviest downpour, what sight should be observed but JERRY BARBER nonchalantly going about with a tennis racket tucked under his arm. Either he's going in for underwater tennis, or is champion optimist bar none. At any rate, according to that old Chinese proverb, "this takes the cake."

And, girls, speaking of "underwater" how about swimming? I know it's a little early in the season, but it's not too early to think about that swim suit. Daly's has just received their first 1957 shipment of your favorite brands — Catalina, Jantzen, Rose Marie Reid. Do you prefer stripes, pastels, plaids, prints? Well, Daly's has them all. In fact, there are 35 new styles to choose from in new glamour fabrics! \$10.95 to \$29.95.

A mild controversy seems to have arisen over "Hello Lane." Two weeks ago an editorial by EDDIE KEENAN appeared in the Lumberjack about the "Lane's" misnomer and how it was failing in its purpose. Since then there have been many reactions to this. It was even the topic of the Lumberjack's first "inquiring reporter" column. ("Do you think Hello Lane is doing the job it's supposed to do?") Answers were negative.

And now "SHADES" (first a musician, then a reporter and now a "comedian") has this to goodnaturedly say about the subject: "I hear plans are in the making to get a bronze plaque beautifully inscribed 'Hello Window, Dedicated 1957' to bolt on the front door of the Coop." Ah, well . . . well see what, if anything, develops in the future.

Say, have you noticed some of the snappy dresses on campus? (Male, of course!) And among the snappiest are those sporting the sweater-shirts that are all the rage. Guys, get on the bandwagon. Daly's Men's Store of Eureka has a new spring selection of sweater-shirts in famous Town and King brands. There are numerous styles to choose from in about every color imaginable — white, beige, grey, blue, mint and maize. Most are with contrasting trim. Your choice of orlon or wool blends, \$7.95 to \$10.95. Sizes small, medium, large and extra-large.

We heard that not too long ago Mrs. Humphery, placement supervisor, was making out a requisition for some office materials. She asked her two student assistants if they wanted anything ordered for the office. Up pipes JOYCE RASMUSSEN: "Sure, one handsome male, under 25, unattached, dark, curly hair!" SANDY BISHOP blithely added: "And one for me, too." So!

Overheard in the Coop: 1st girl: "Say, look at that, would you." 2nd girl: "Sure is cute. Handy, too." 1st girl: I hear they come in pink, yellow, tan, grey, beige, white, wedgewood and black patent." 2nd girl: Boy, I'd sure like one. Let's ask her what it cost." 3rd girl: I heard that; they're only \$2.98.

What, what, what, you say? Why, Daly's new Globetrotter Juniors, a purse of the "bucket bag" type that's so very popular. These sharp little numbers are of top grain natural leather — durable as well as fashionable.

Well, nuff for now. S'long.

# HSC THINCLADS OPEN 1957 SEASON

## TEAM TRAVELS TO SACRAMENTO FOR DUAL MEETING WITH HORNET CREW

BY BOB BESTOR

Humboldt State's 1957 track squad get their first taste of intercollegiate track and field competition tomorrow when they travel to Sacramento for a dual meet with the Sacramento State Hornets at 2 p.m. on the Hornet's home grounds.

Coach Bob Doornink has announced he will take a 24-man squad into the curtain raiser. Making the trip south will be Larry Amos, 440 and relay; Warren Baker, high jump and high hurdles; Armand Baradat, two-mile; Mike Barkdoll, 880; Earl Barnum, broad jump, high jump and relay; Harman Bonnicksen, sprints and relay; Pete Carpine, shot put and discus; Darol Foster, low hurdles.

Also Marcus Gaddy, high jump and pole vault; Ralph Johnson, discus, javelin and low hurdles; Dale Kohinka, mile and two mile; Rego Piva, pole vault and low hurdles; Gerald Ray, 880; Myron Rebb, low and high hurdles; Bob Rucker, low hurdles and 220; Charles Schubert, shot put and discus; Larry Smith, 880; Wayne Smith, two mile; Bob Tipling, high hurdles; Richard Trone, mile; Manuel Vasquez, 100 and pole vault; John Washington, 100 and broad jump; Paul Williams, 440, broad jump and relay; Ben Zlataroff, shot put and discus.

Many of the Lumberjack speedsters have been hampered by poor weather. Paul Williams so far has not yet approached his school record of 50 seconds flat in

the quarter mile this season. FWC record-holder in the broad jump, Earl Barnum, has as yet been unable to get off any practice broad jumps, although Doornink is confident that the red-head from Dunsmuir will better his conference mark of 23 feet two inches set last year.

However, the time trials did produce a bright spot for Humboldt's track aspirations as Dale Kohinka, freshman distance man from Eureka, churned out a new school record of 10:40 in the two mile. Kohinka's record eclipsed the old mark set last year by Eric Hughes.

The Jacks, however, will be without the services of two of last years outstanding performers, Hank Cooper, holder of the school javelin record and Jim Davis, stand out hurdler. These thinclads turned out late and will be unable to make the trip.

Above are some of the members of the 1957 Lumberjack track team. They are, back row, left to right, Charles Schubert, Emit Goodwin, Don Hall, Charles Hubler, Roy Savage, Fred Whitmire. Middle row, Earl Barnum, Armand

Baradat, Bob Smith, Don Ray, Paul Williams, Marcus Gaddy and Frank Barkdoll. Front row, Roy Escarcega, Harvey Kesterson, Dale Kohinka, Harman Bonnicksen, Wayne Smith and Ben Crabb, manager.

## INDEPENDENTS IN LEAD IN INTRAMURAL HOOP RACE

Intramural player of the week is Ed Hansen of Nelson Hall. Ed has been a consistently high scorer for Nelson Hall all season and been a definite asset to the team. His crowning achievement was the 31 points he scored against the Intercollegiate Knights as Nelson Hall romped to an 85-19 triumph. Ed has also been active in the organizational branch of intramurals and has been extremely active as Nelson Hall's organizer. For his contributions to intramurals Ed Hansen is named intramural player of the week.

After the week's activities in intramurals the IQ's still find themselves at the head of the hoop parade. The IQ's retained their lead in a hard fought game with Block H. The game ended 37-31. Another highlight of the week was the 40-41 victory which the Ramblers scored over the inspired faculty. The outstanding achievement of the week was the 85-19 victory scored by Nelson Hall over the IK's.

In the first game Tuesday night CU scored a 42-28 victory over Redwood Hall. High point man for CU was Curtis Bolton with 15 points followed by Dick Laursen with 11. Dennis Colleran, Dwayne Maxwell and Jesse Washington each scored 8 points for Redwood Hall.

The second game of the night featured the league leading IQ's and the troublesome men of Block H. IQ's emerged with a hard fought 31-37 victory. High point man for IQ's was Charlie Hale with 14 points. Jerry Anderson followed with 10. Ron Fredericks was high for Block H with 7 points. Paul Williams and Warren Smith tied for second place honors with 6 points.

Nelson Hall scored the outstanding victory of the night as they racked up a record breaking 85-19 victory over IK's. Big gun for Nelson Hall was Ed Hansen, who bombarded the hoop for 31 points. This is a new intramural record. Jim Batten also scored big for Nelson Hall as he inflicted 22 points against the opposition. Following up this merciless torture on the hoop were Dick Hanson with 14 tallies and Hal Maertins with 10.

Wednesday's night action was initiated by Redwood Hall and Alpha House. Alpha House won the game 54-25. Dick Trone led the Alpha House five with 16 points. James Colwell and Fran Hopper scored 11 points each for Alpha House. Dennis Colleran racked up 15 points for Redwood Hall.

The second game of the night was an exciting affair between the Faculty and the Ramblers. It was a long drawn out battle to the very end and the Rambler squad was relieved to have pulled through with a one point 40-41 victory. This has been the Faculty's most exciting game to date and if they continue to play this brand of ball they will be a spoiler team. Norm Wright scored 16 points for the Ramblers and he was followed by Rich Cox with 12. Franny Givins and Dr. Netcher scored 18 and 12 points respectively for the Faculty.

The final game of the night pitted Block H against CU. Block H emerged the victor 42-33. Ron Fredericks scored 22 points for Block H and Bob Seeler was high for CU with 11 tallies to his credit.

The standings are now as follows:

IQ's	4	0
Ramblers	5	1
Nelson Hall	4	1
Block H	5	2
Alpha House	3	3
Conservation Unlimited	2	4
IK's	1	4
Faculty	0	4
Redwood Hall	0	5

Intramurals table tennis will get its initial start on March 12. The four tables will be located in the balcony of the gymnasium. The winner will be determined by the best out of three games and 21 points will constitute a game. A series of four tournaments will be held to determine the finalist. Ed Hansen is the official scorekeeper and it is stressed that all participants report to their games on time. A list of the scheduled games have been given to team managers and all competitors should keep abreast of their coming games.

## SPORTS

### VARSITY TAKES 1-0 WIN OVER B'S IN INTRASQUAD TILT, PLAY GAME TODAY

BY TOM FAY

Early in the week Coach Ced Kinser was searching for a Saturday game for the HSC baseball team. In the event that no game is scheduled the Lumberjacks will play an intrasquad game on the college field starting at 12:30 p. m.

The Humboldt State Varsity Nine nipped the "B" Squad in a nip and tuck battle by a close 1-0 score. The "B" squad out-hit the Varsity seven hit to four, but couldn't put them together to score a run.

The pitching looked good for both squads. Jim Richardson started for the "B" squad, and was later relieved by Mauney, Carlson and Downerd. Maze started for the Varsity, and was relieved by Burke and Wilbur. The hitting for both squads was weak and unimpressive. The Varsity's lone run came when Bob Lawson singled, advanced to second on an out, and came home when a grounder went past the shortstop.

The Jacks have been playing intersquad games, and practicing for their first road trip of the season. On March 23 they will travel to Moraga to pit their hurling and batting averages against St. Marys Gaels. March 24 finds them at San Francisco, going against the USF Dons, and on March 25 they travel to Berkeley to play the all powerful Bears of California.

HSC "B" TEAM

## MINUTES OF THE STUDENT COUNCIL

(Continued from Page 2)

Mike showed the council a blazer that was received that could be used for an award or a club jacket. The information was given to Jim so it could be presented to ICS.

It was moved, seconded and passed to accept the recommendation of Warren Baker as student representative to the Athletic Advisory Board.

A letter was read from Van Tonkins informing the council that the Lennie Niehaus-Bill Perkins Kenton All Stars Quintet will be available on April 23 or 24. It was moved, seconded and passed that the Associated Student Council sponsor the jazz concert on April 23 or 24 and the financial matter will be referred to the Board of Finance. Mike is chairman and committee members will be Don Peterson, Jim Callison and Chip Brodie.

### NEW BUSINESS

Mike reported on the California State Colleges Student Body President's meeting that he attended. He also suggested that we have an entertainment committee similar to that of San Jose State. This entertainment committee would be a sub-committee of the council and the members would not belong to the council. The main function of this committee would be to investigate, coordinate and recommend to the council entertainment available that students would be interested in. It was moved, seconded and passed that a standing entertainment committee be established and it will be composed of four people to be appointed by the Executive Council.

It was moved, seconded and passed to accept Dick Sorenson as Chairman of Dad's Day.

It was decided that an evaluation sheet concerning the recently held Leadership Conference will be sent to the High Schools along with the booklet that is being prepared.

### COMMITTEE REPORTS

The ICS Coop Furniture Committee reported that the downstairs room will be painted and curtains will be put up. As of yet the committee has not received any donations of furniture.

The Coop Expansion of Food Products stated that rolls in cellophane packages and addition sandwiches have been put in the Coop at night.

Parking Committee reported that the committee met with Dr. Karshner and Mr. Devery. The recommendations presented were as follows. Thirty-five parking spaces will be reserved for Nelson Hall and 19th Street will be reserved for Theata House. Stickers will be given. The committee also requested that these recommendations be studied as soon as possible. A report received by this committee from the Administration stated that this problem is presently under consideration.

It was suggested that parking areas be marked especially in the parking lot west of Nelson Hall. Dr. Karshner is to see Mr. Devery about this matter.

The Pep Band Committee suggested two things that could be done to secure a pep band. They are:

1. Pep Band be  $\frac{1}{2}$  unit and be separated from the band and the members of the band belong to the pep band.
2. Pep Band sponsored by an

organization. They would just be responsible for seeing that people would play for games.

It was suggested that this pep band be established both semesters for basketball games and rallies. The committee is to contact Mr. Backman and get the feeling of the band. Also they are to find out about the possibility of the pep band members receiving  $\frac{1}{2}$  unit of credit.

### COMMISSIONER REPORTS

Activities Commissioner reported that ICS will bring up campus sororities and campus spirit for discussion at their next meeting on Tuesday, March 12.

Awards Commissioner reported that at the Athletic Advisory Board it was reported that Franny Givins will be sent to the NAIA Tournament. It was moved, seconded and passed to refer the matter of the ASB contributing \$100 to the Board of Finance.

Board of Finance: It was moved, seconded and passed to accept the following prices:

1. 60 cents for children and students with Activities Cards and \$1 for adults and non Activity Card holders for the Alpha Psi Omega presentation of the Bishop's Company.
2. 50 cents with Activities Card and 75 cents without for the Comus Club Dance to be held on Friday, March 8.

Graduate Manager: It was announced that due to many difficulties in the building of the

Observing one of the many exhibits of Business Day, held on campus March 6, are D. D. Brubin, Mrs. Imogene Platt, Carolyn Falkenberg, C. P. Ferret and Albert W. Blood.

porch on the Coop it was vetoed by the Administration. It was reported that possible suggestions can be obtained from various companies concerning improvements of the present facilities of the Coop. In lieu of this recommendation from Jack Sears the minor alternations recommended by the sub-committee on Coop rejuvenation to be postponed until we receive information from the companies.

Respectfully submitted,

Roberta Johnson,  
ASB Secretary

Mike Fielding,  
ASB President

## Carolyn Walker To Speak At Meeting

Mrs. Carolyn Walker, bridal consultant from Eureka, will speak at a regular Home Economics Club meeting to be held March 19 in the SEC sewing lab beginning at 12 noon.

Every girl interested is invited to attend. Mrs. Walker will also be glad to answer all questions.

There are three more Home Ec bake sales coming up in the remaining months. They are scheduled for March 27, April 24 and May 15.

The Home Economists from

## Peterson

(Continued from page 2)

The duties of Assemblies Commissioner are to serve as the Associated Student Body representative on the Faculty Assembly Committee; to be in charge of the student assembly program; to attend all meetings of the Executive Council as a voting member; and to be the presiding officer of the student assembly committee. The student assembly committee is organized and the size is determined by the Assembly.

Peterson also helped various departments and organizations sponsoring assemblies by coordinating between the Administration, the Business Office and the Student Executive Council. One of the main duties is to see that all the programs are well planned and that preliminary planning such as cleaning up the place for the assembly and getting the equipment necessary is taken care of.

Mike Fielding, ASB president, said, "Don came into office late which makes him relatively new to the position. He has done a good job in carrying out the responsibilities of the Assemblies Commissioner."

This office will be open in the general elections on April 23.

KIEM-TV will speak at a regular noon meeting of the Home Ec Club on April 9. Visitors are invited to attend.

# Sticklers!

WHAT IS A SQUAD OF SOLDIERS WHO DON'T GET A LUCKY BREAK?

(SEE PARAGRAPH BELOW)

**BASIC TRAINING** for R.O.T.C. men. When the talk turns to tactics, remember this: troops who don't get a Lucky break soon become a *Solemn Column*! Why? Any private can tell you: Luckies outrank 'em all when it comes to taste. You see, a Lucky is all cigarette . . . nothing but fine, mild, good-tasting tobacco that's **TOASTED** to taste even better. On the double, now! Light up a Lucky. You'll say it's the best-tasting cigarette you ever smoked!

### STUDENTS! MAKE \$25

Do you like to shirk work? Here's some easy money—start Stickling! We'll pay \$25 for every Stickler we print—and for hundreds more that never get used. Sticklers are simple riddles with two-word rhyming answers. Both words must have the same number of syllables. (Don't do drawings.) Send your Sticklers with your name, address, college and class to Happy-Joe-Lucky, Box 67A, Mount Vernon, N. Y.
