Music Man Of Note, Stan Kenton, To Appear Here In Jazz Show

Stan Kenton, for five consecutive years winner of Down Beat Magazine's popularity poll as leader of the nation's number one orchestra, will appear with his great new 20 piece organization Wednesday, Feb. 25, at 8:30 p.m. in the HSC gym.

STAN KENTON

Sponsored by the Associated Students and the HSC Jazz Club, the personable bandleader will be making his first local appearance. His band is generally believed to be the most outstanding musical aggregation in the country. Sometimes called "Modern America's Man of Music", Kenton is one of the most colorful and controversial figures in the world of music.

This concert will be the second of the year and the sixth jazz show brought to Humboldt State. Stan Kenton is by far the "biggest name" to play at HSC. Tickets will be on sale soon.

Kenton was graduated from Bell High School in Los Angeles in 1930. His mother was a piano teacher who made him understand that he was meant for music but it was not until after a siege of saxophone, trumpet and even bongo that he reverted back to the piano. After high school he played wherever he could from San Diego to Bakersfield, having the price of dinner one day and wondering what would happen the next. Later he was able to get studio calls and finally became assistant musical director at Earl Carroll's theater restaurant.

It was then that Stan became

KNIGHTS CONDUCT TOUR

Members of the Intercollegiate Knights, men's service honorary society, conducted a tour of the campus for new students on Jan. 21. A sizeable group of freshmen and transfers were on hand for the tour.

conscious of the stagnant state of the music business in general, formed his own band and spent every spare moment at the piano writing arrangements.

The current band is the nucleus of Kenton's third organization, the famed "Innovations in Modern Music" orchestra, a 40-piece concert orchestra that used a 16-piece string section, woodwinds and french horns, all unprecedented in Kenton musical history. The 40-piece orchestra has had two nationwide concert tours including a concert in Hollywood Bowl.

Kenton formed the 20-piece orchestra to keep the nucleus of this group together. The acclaim accorded the dance band during past engagements at theaters, clubs, and ballrooms prompted the arrangements for the current tour.

State Civil Service Exams Next Month For Info Officer

State civil service examinations for the position of Assistant Information Officer are scheduled for Feb. 28, 1959, according to announcement from the California State Personnel Board. The last date to file applications is Feb. 6. The examinations will be held in a number of California cities.

College graduates who have had two years of full-time paid professional writing experience may qualify. They should be familiar with methods of editing publications, including the organization and layout of printed materials, and with public information channels and methods. They should also be able to write factually and effectively.

Starting salary is \$458 per month, with annual merit increases to \$556. However, prior to reaching the maximum in this classification, it is possible to advance to the position of Information Officer I, with a salary range of \$584 to \$710.

Complete details and official application forms may be obtained from the State Personnel Board offices at 801 Capitol Avenue, Sacramento; 217 W. First Street, Los Angeles; and 515 Van Ness Avenue, San Francisco; or from any State Department of Employment office.

Toyon Names Janice Williams Editor-In-Chief

JANICE WILLIAMS

Janice Williams, sophomore English major, has been named editor-in-chief of Toyon, campus creative writing magazine, which will be published during spring semester.

The magazine Toyon, now in its fourth year, was originated to provide an outlet for students interested in creative writing. Dr. Ralph E. Samuelson, assistant professor of English, is faculty sponsor of the magazine. Also named to the staff as managing editors are Bruce Paige, sophomore game management major, and Gary Harber, junior history major.

Miss Williams has said that no limitations of creative writing media will be set for the 1959 edition. The editorial staff is interested in gleaming from the student body the very best of poetry, fiction, and the general essay. In addition to providing a campus audience, publication in Toyon offers the student writer the opportunity of placing his work before some of today's top leading editors, since copies of the magazine are distributed to some 100 select colleges, book publishers and magazine editors throughout the country.

The 1959 edition of Toyon will appear on campus during the middle of spring semester and sales will be handled by the HSC Business Club.

Manuscripts to be considered for publication should be submitted either to Dr. Samuelson, House 3-BB, or to Miss Williams. Manuscripts should be double spaced. If the students wishes them returned his box number should be included on the manuscript.

Here's One Way Of Looking At The New Spring Semester...

Well, kiddies, here we are, ready to face the firing squad once more. Fate — and the Registrar's Office — allowed us to return to the salt mines for another semester of good, clean fun, and blood, sweat, and tears. They, (no names, please) must figure that we're hale and hardy souls, so they let us run the gamut of the registration line. First we were in an over-heated gym watching basketball practice and then, swoosh, we were out in the wind and the rain, wondering if those already present signs of a cold were going to become full-blown, and then, glorioski, we were inside, fumbling for a residence card and all we could find was last year's library receipt instead of a little white pasteboard.

We finally found the card, buried back under a sheaf of forms and questionnaires, and having mumbled apologies for delaying the line a half hour, meandered upstairs of the gym, only to find a gendarme smiling benignly. (My gosh, did I pay that parking ticket?) So, after finding an adviser, thanks to our handy radar scope, we got signatures and classes, only to find that two graduation requirements came at the same hour. Well, that's the way the doorknob turns. And then, when we went over to get the IBM cards, they were all gone. There ain't no more, Dad. So, back to the adviser, only to find that he'd gone out for coffee.

Several hours later, and several dollars poorer, we were the proud possessor of a little yellow card, a headache, and an almost empty wallet. But the fun was not yet over. Down to the Book Store, armed with a trusty book list, and the hope that the old man's check wouldn't bounce, we slopped through the mud. Ah, the Book Store. It brings back memories of Times Square on New Year's Eve. Not only was the last USED book (reduced price) gone, but some slippery-fingered character had just snatched the last, absolutely the LAST book from your own grasping paw.

Just because we knew the prof was going to assign the first 50 pages to read at the first class meeting, we couldn't get a book

for love or money. Well, money, anyway.

So, we went to class yesterday, anyway, hoping for the best. Smile, Dad, and tell Old Snarf how much you're looking forward to his class... gush, gush, gush.

Sure, we gripe and grouse but when it's our last semester, and that pomp and ceremony of graduation isn't too far away and it kind of seems that all too soon we'll be saying "Now, when I went to college..." those classroom saltmines look pretty good.

—G. R. Spelvin

Division Head Accepts New Chicago Post

DR. ARCHIE JONES

Dr. Archie Jones, chairman of the Division of Social Sciences, has accepted appointment to the post of Assistant Director of the Chicago Historical Society. He will begin his duties there on July 1.

Announcement of his appointment was made last week in a faculty meeting by President Cornelius Siemens.

The Chicago Historical Society, one of the leading historical societies in the Nation, is a privately endowed institution which maintains a museum of American history, one of the Nation's outstanding research historical libraries, and publishes books, documents, and a quarterly magazine "Chicago History." The Society also provides research fellowships, and sponsors public lectures by leading authorities in their field.

As assistant director, Dr. Jones will assist in the administration of the society and in the editing of the various publications.

Dr. Jones has been a member of the Humboldt State College faculty since 1956, coming here from Hastings College, Nebraska. He received both his M.A. and Ph.D. degrees from the University of Chicago. He was named chairman of the Division of Social Sciences at the beginning of the 1958 fall semester.

He is a nationally recognized author and lecturer on early American history and its influence on twentieth century culture. Last summer he was one of two U.S. educators chosen to lecture on American Protestantism at an Institute of Specialized Study sponsored in Philadelphia by the board of Christian education of the Presbyterian Church, USA.

Humboldt In The Swim Of Things With Newly Completed Natatorium

Humboldt State's spanking new Swimming Pool will open to classes Tuesday, vastly expanding the college's swimming program and bringing a long-time dream to fruition.

The new Fieldhouse also is being rushed to completion with prospects that it can be put to use in about another month.

The two projects represent half a million dollars in construction and give HSC a four-unit, interconnected physical education plant that includes the old Women's Gym and the new Men's Gym. General work is being done by Olson and Glover Construction Co. of Oakland, plumbing by Ed Peterson Co. of Eureka, heating by Brizard Construction Co. of

Eureka, electrical work by Shasta Electric Co. of Redding. Total cost was \$561,150.

Humboldt's swimming program previously was limited to classes in the Eureka High School pool which were conducted every other semester for P. E. majors to satisfy the state credential requirements.

But this semester 13 swimming sections have been offered. Prof. Gene Asprey is handling two sections of elementary swimming for men and two of intermediate swimming for men; Prof. Gordon Schroeder has two sections of intermediate swimming for men; Mrs. Kathy Goetz is offering two elementary and

two intermediate classes for women. Dr. Louise Watson and Prof. Robert Doornink is offering a swimming class for P. E. majors. Prof. Kay Gott will teach courses in water safety.

In addition, the P. E. department is planning to put out a call for candidates for a water polo team and an intercollegiate swimming team. It is also expected that intramural swimming competition will be established, it was pointed out by Dr. Joseph M. Forbes, division chairman.

Some recreational swimming for the student body will ultimately be included. The college expects to adopt a policy this spring on use of the pool by the public after

the needs of the college and questions of liability have been fully explored.

"We expect very heavy use of the pool this semester, especially by upper division students who will be having their last opportunity to use the facility," Dr. Forbes said.

The new pool is NCAA official size, 75 by 42 feet, allowing for six racing lanes. Depth is graduated from 3 to 11 feet, with a sharp incline toward the deep sections. Three foot and 10 foot diving boards are included.

Since the pool is connected directly with the two gym students will be able to use dress- (Continued on Page 7)

Safety Or Suits?

As part of a long-range expansion program, Humboldt State College will soon have added to its campus several new and impressive buildings equipped with modern devices and latest teaching aids. HSC should and will be justly proud of this outlay for campus betterment. While on the subject of campus betterment, we're wondering how much the street lighting and safety factors will improve; there is certainly room for improvement.

Street lighting has improved in the last few years, but it is still far from adequate. Now, with construction going on, and the resultant ripped-up streets, chuckholes, ditches, equipment, and items around, lighting would seem to be even more important. Contractors, however, must leave equipment and supplies at the working site and cannot be blamed, as they know the law regarding contributory negligence, and take the necessary precautions against injury and injury suits.

Lighting, regardless of the construction projects, is frankly inadequate and hazardous. Humboldt invites many non-college people to its campus for evening programs and events. Some of them are older people whose eye-sight may not be sharp enough to see a chuckhole in the shadows as they grope their way along the campus. Older people have brittle bones and a broken hip could result from a nasty fall in the dark. A law suit could also result.

To bring the situation closer to home, last year night classes were held in the Music Building. Several older students, in their fifties and sixties, who worked during the day and who were not familiar with the terrain by daylight, attended classes. At night, and especially when it rained, they stumbled more than once as they left the building to go to the Coop or to their cars. They could have fallen and been injured.

We're also wondering how long the sand strips on the concrete steps will last; several have already come off. Before they were applied a couple of years ago, several students and staff members limped around from falling on wet, slick concrete. The ideal answer would be to sand blast the entire tread area of the steps and install adequate hand rails. Wet slick concrete when covered with mud is dangerous, yet the situation is prevalent on campus. When the new buildings are completed and steps and streets also completed, we trust the necessary safety precautions will be taken, and that, at the same time, if not before, the present hazards will be corrected.

Or will it result in a law suit?

LETTER TO THE EDITOR

Inglewood Daily News
121 North La Brea Avenue
Inglewood, 5, Calif.

January 12, 1959

Diane Anderson
Editor
Humboldt Lumberjack
Arcata, Calif.

Dear Miss Anderson:
Every week about this time a copy of the Lumberjack comes to us through the mail. It comes addressed to George Watson of my department. Mr. Watson has not been with me for about two years, but that is definitely beside the point.

Somehow I developed the habit of reading the paper. (I suspect at first it was in hopes of finding some reference to a local team or event, trying to figure some reason for receiving the paper in the first place. But, since I haven't seen a Humboldt State team in action since the football season when they were badly beaten here in Inglewood by a Pepperdine College team, I have failed to ascertain how we remained on your mailing list.)

But, bit by bit, I found myself almost looking forward to each week's copy of what I have come to consider an excellent college publication. I have followed student activities, learned to hate Chico State, read Larry West's offerings, read and very much enjoyed the professionally done column of Pat Baker, and, of course, followed the progress of all the Lumberjack Athletic teams.

Following lunch today, during which I absorbed all the latest State news, I decided I was past due in writing a letter (this one) telling you how much I do enjoy your paper and what a very fine job I believe you are doing.

To the best of my knowledge I have never been in or near Arcata, but if I ever am I hope to be able to drop in and personally meet this imaginative staff (who else but an imaginative staff could up with a headline "Where Has the Time Gone Already Yet?") that I have come to know in print and again relay my congratulations for a newspaper job well done.

Very truly yours,

Warren Turnbull
Sports Editor
Inglewood Daily News.

'RUSH PARTY'

The Lookout

Health Center Affords Troy Students Psychiatric Counsel, The Daily Trojan, University of Southern California.

There is no couch — but who needs one?

Not with four well trained psychiatrists at the SC Health Center who believe that just sitting down and talking is one way that a student can get better understanding of the cause of his mental problems.

Near the end of the school year there is usually an increase in mental ills, especially among the seniors. "We call this 'senioritis' because it reflects their anxiety about getting into the business world and out on their own," said one of the staff.

There are many symptoms of anxiety, the more common ones being tenseness, insomnia, lack of appetite and inability to concentrate, he went on. The physical symptoms are headaches in the back of the head, stomach aches and even nausea. Sometimes even medications must be prescribed to relieve severe tension.

(No kidding. Who'd have guessed it? This joker should listen in on armchair psychiatry in the Coop.)

Campus Spotlight

By BONNIE

Hi There,

DALY'S and I want to welcome everyone back this semester, especially all you new students. Campus Spotlight is written every other week to give all the news 'n views on campus wear from DALY'S Department Store in Eureka.

Thursday morning was a typical early morning in Nelson Hall with alarms ringing loudly from every room, and everyone yawning sleepy "hellos" as they passed in the halls. All of a sudden someone screamed "OH NO!" and we all ran quickly to her door wondering what was wrong. The smiling look on Diane's face started at her hand in which she held a toothbrush and a tube of toothpaste... "My Peppodent toothpaste ran out of stripes!"

Spring is sprung and DALY'S new fashions are here! Boy, oh boy, I just can't wait till DALY'S "Spring Fancy" Fashion Show on Feb. 12 at 8 p. m. in the CES auditorium. Admission is only 25c. All the brand new Spring Styles will be modeled by ten lovely HSC coeds: Barbara Wilber, Glendyne Baldwin, Lois Gardenhier, Mary Ann Regan, Judy Ferguson, Marilee Ammer, Jo Ann Ferguson, Elisevera Ryerson, Susan Runyan and Pat Hodges. You'll get a chance to see the latest styles of Spring in Sportswear, Dresses, Sleepwear and other fashionable clothing. For that extra, added touch, DALY'S has the biggest, grandest finale ever to hit HSC! An exquisite bridal scene with bride exclusives from DALY'S Bridal Salon.

Just think, for only 25c YOU may be the lucky winner of DALY'S \$65 Door Prize! This includes a gorgeous \$65 Spring Wardrobe! And ladies, this includes a Wardrobe from the inside to the outside. Beautiful lingerie, Nylon Slip, Spring Shoes, Bag, a lovely Hat, and loveliest of all, a feminine R & K Spring Dress. Some lucky lady will be the Belle of the Ball wherever she goes, in DALY'S \$65 "give-a-way" Spring Wardrobe.

On a college birdwalk our instructor identified the first birdcall. When the next call was heard, he asked, "What was that?"

"A chipmunk," one of the girls volunteered.

"No," the instructor said patiently, "that's a tufted titmouse."

"Well," said the girl proudly, "at least I knew it wasn't a bird!" (Ah, come on, Sue.)

Well everyone, once more the space is running short, so guess I'll have to close. Hope you made it through registration okay, and not like poor Jim who said when he started out he was 6 feet 1 inch, but after being pushed, shoved and run over in the registration line, he is now only 5 feet 11 inches tall. Poor guy.

Soon the Fashion Show will be Here for everyone to see. For the latest, smartest fashions for Spring, DALY'S Store has everything!

Colorful Campi Hello, Out There!

By Larry West

In response to popular request, I am bringing to you again a column of glorious, glamorous, views of the camp. I found after interviewing five (5) people that the vote was 2 to 1 with 2 abstaining that my column should continue. Feeling that I could not deny such an overwhelming mandate of the student population we return this week to look in on Zerk Snafu, who has just finished his first semester at Heck of a Smell College.

As we look in on Zerk we find him just registered for his second semester in HSC. The day is dreary, the sky is overcast, and for the first time in 1087 years the proud cacti which dot the HSC campus are standing in 11 feet of water. Zerk, however, is not the type to let either his 1.09786 average, or the weather bother him. For as we paddle across camp, we see a gondola tied up to the seats in the 18th row of the stadium. Inside is none other than our hero with Felicia Boobs, a charming young lady with 2 very blue eyes, 2 very luscious lips, 2 lovely long arms, 2 gorgeous legs with feet to match, and LAST BUT NOT LEAST... two (2) of the most beautiful, rounded, rolls of one hundred dollar bills that Zerk has ever laid his eyes on. Zerk, clever fellow that he is, has been aching to get his hot little hands on Miss Boobs'... money.

And as we approach closer we are just in time to see Zerk conclude the transaction, in which Zerk promises to deliver to Miss Boobs each week two (2) large athletes (for study breaks) and two (2) small but brainy physics students (for study helps).

This on the surface appears to be an overwhelming task, but Zerk is up to it, for everybody knows that pledges in Zerk's frat. (I'n 'flunkin UT) are ready and willing to do anything to gain the approval of the big active... and since Zerk is a big Active, the pledges will be especially willing to spend one evening a week with Miss Boobs... Thus Zerk solves his problems for another semester... chucks Felicia overboard and paddles off into the mist... It's been a grand day... Miss Boobs cooperated, he has signed up for the same education courses he had last semester (different titles and numbers of course) and the future stretches bright before our hero as his gondola sails down the hill into the open doorway of the Keg, where jumpin' Jerry toddles his flute from atop a chandler.

Thus we end another column. Just would like to bring your attention to the election of semester last for one little minute. Seems that one of the old gang is gone... But all of us who know him want to say to Jon Mitts... Thanks a lot for a job well done. Jon is one of the strongest supporters of HSC and has devoted one heck of a lot of time to building up the school. We're going to miss him on council and it's a sure bet that all of us are going to have to work a little harder to fill the shoes that he left. Again, thanks Jon, for your devotion to the school and its government, and lots of luck when you go out into the cold, cruel world.

Pat's Perusals

By PAT BAKER

Hi... and welcome back (or, welcome to, if you are a newcomer). Registration went much smoother this semester... only had to stand in line for an hour, instead of the customary three! But, it was raining! Got all the courses I wanted, too! Speaking of that line, you can get an education just waiting to register. Instructors who want to evaluate their "instructing" should listen to a few of the comments. HSC students will be doing a lot of studying if all the promises that I heard being made are carried forth. One student even remarked he was going to do all the end of the semester assignments during the first two weeks of class! and, keep all his notes up to date, read all his assignments when assigned! Now, that is a pretty tall order for one li'l student... that long, two-day vacation must have gone to his head.

A subliminal suggestion! Don't forget the Associated Women students Fashion Show. It will be held on Feb. 12, CES Auditorium, starting at 8 o'clock, 25c. A showing of Spring clothes, offered by Daly's in Eureka, will be modeled by HSC coeds. The grand finish will feature a complete bridal ensemble... The proceeds will go towards scholarships.

The Newman Club has sent out a special invitation for all you students to attend the Mardi Gras. Plan to attend this gala event on Feb. 7 in the Women's Gym, following the HSC-Gonzaga basketball game. You have to attend to cheer on your favorite faculty members, Mrs. Evelyn McCurdy and Mrs. Kathy Goetz, and Prof. Charles Fulkerson and Prof. Gordon Schroeder to victory as queen and king of the event. Only \$1.25 a couple.

Tried to think of something really humorous to end this week's column... but what is funny about finals, grades and registration? An ominous lull has settled over the campus and news is very scarce. So, guess this will do it for this time. Good luck on the ensuing semester.

episodes interwoven with it, compiling a full dramatic life for both herself and the house.

A French Hotel maid comes to being in "Jeanne". This is another character taken from life and her story with its French Circus background is a fascinating one. "Solitaire" presents one of those American women who, seemingly without ties or direction, spend their later years going from one European hotel to another, trailing the remnants of their former elegance with them. The denouement is dramatic and unexpected.

Does Comedy Sketch
On the comedy side, "Having Nice Time" introduces "Hazel" who is a "card" and who finds her fun at Soda Fountains where she meets the nicest people. Rosa of Fisherman's Wharf appears again in a poignant little tale of "Old Saint Marys", and the Carter Wilson family have hilarious difficulties with "Sally's First Love."

In the first program of the series Nov. 17 Russell Jones, Pulitzer prize winner and chief United Press International correspondent in eastern Europe, addressed the student body.

The assembly series is sponsored by the student body and the office of the dean of activities in place of previously held special emphasis weeks. If enough interest continues to be shown, similar major assemblies may be held monthly next year.

ROOM AVAILABLE FOR TWO GIRLS.

May use all household facilities. — Kitchen, laundry, linens, TV, etc. Right in Arcata, 956 J Street. Reasonable. Phone VA 2-0460 or VA 2-2697.

DEANS AT CONFERENCE

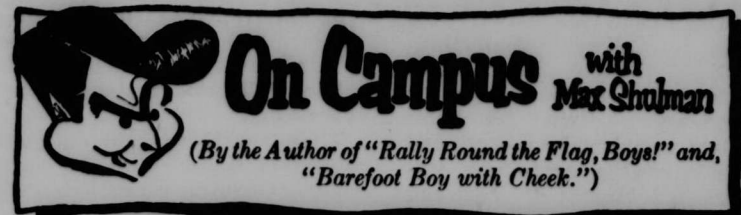

Dr. Don Karshner, dean of students, Dr. Nedd Gerard, associate dean of counseling and testing, and Dr. Chester Collins, associate dean of admissions and records, will attend the annual convention of the West Coast Conference of Deans on the University of Oregon campus in Eugene this weekend, January 30-31.

The conference is made up of deans of students from the 11 western states who discuss problems pertinent to student personnel services and programs.

THE GIRL I LEFT BEHIND ME

It happens every day. A young man goes off to college leaving his home-town sweetheart with vows of eternal love, and then he finds that he has outgrown her. What, in such cases, is the honorable thing to do?

Well sir, you can do what Rock Sigafoos did.

When Rock left Cut and Shoot, Pa., he said to his sweetheart, a simple country lass named Tess d'Urbervilles, "My dear, though I am far away in college, I will love you always. I will never look at another girl. If I do, may my eyeballs parch and wither, may my viscera writhe like adders, may the moths get my new tweed jacket!"

Then he clutched Tess to his bosom and planted a final kiss upon her fragrant young skull and went away, meaning with all his heart to be faithful.

But on the very first day of college he met a coed named Fata Morgana, a girl of such sophistication, such poise, such *savoir faire* as Rock had never beheld. She spoke knowingly of Franz Kafka, she hummed Mozart, she smoked Marlboros, the cigarette with better "makin's". Now, Rock didn't know Franz Kafka from Pinocchio, or Mozart from James K. Polk, but Marlboros he knew full well. He knew that anyone who smoked Marlboros was modern and advanced and as studded with brains as a ham with cloves. Good sense tells you that you can't beat Marlboro's new improved filter, and you never could beat Marlboro's fine flavor. This Rock knew.

So all day he followed Fata around campus and listened to her talk about Franz Kafka, and then in the evening he went back to the dormitory and found this letter from his home-town sweetheart Tess:

Dear Rock,

Us kids had a keen time yesterday. We went down to the pond and caught some frogs. I caught the most of anybody. Then we hitched rides on trucks and did lots of nutsy stuff like that. Well, I must close now because I got to whitewash the fence.

Your friend,
Tess

P.S. ... I can do my Hula Hoop 3,000 times.

Well sir, Rock thought about Tess and then he thought about Fata and then a great sadness fell upon him. Suddenly he knew he had outgrown young, innocent Tess; his heart now belonged to smart, sophisticated Fata.

Rock, being above all things honorable, returned forthwith to his home town and walked up to Tess and looked her in the eye and said manfully, "I do not love you any more. I love a girl named Fata Morgana. You can hit me in the stomach with all your might if you like."

"That's okay, hey," said Tess amiably. "I don't love you neither. I found a new boy."

"What is his name?" asked Rock.

"Franz Kafka," said Tess.

"A splendid fellow," said Rock and shook Tess's hand and they have remained good friends to this day. In fact, Rock and Fata often double-date with Franz and Tess and have heaps of fun. Franz can do the Hula Hoop 6,000 times.

© 1959 Max Shulman

All's well that ends well—including Philip Morris. Philip Morris ends well and begins well and is made of superb natural tobaccos by the same people who make Marlboros.

Oceanographic Report Submitted To State By HSC Researchers

by RON KUNSTAL

The Humboldt State College fisheries program recently submitted an annual report covering oceanographic studies between the points of Trinidad Head and the Eel River to the State of California Water Pollution Control Board.

This study's objective is to get information on the effect of waste discharges on a marine environment not presently under the influence of marine outfalls. This will permit more scientific analysis, design, and operation of marine waste disposal facilities.

Under an agreement ratified on March 7, 1958, between the State of California Water Pollution Control Board and Humboldt State College, it was agreed that Humboldt State would make a continued study of the near-shore waters off Humboldt Bay and submit this information to the Board.

This project is under the direction of Dr. George H. Allen, assistant professor of fisheries here. Dr. Allen has been assisted by two HSC graduates, Jerry Larrance and Carl W. Sims.

The oceanographic data included in the first annual report was collected during the months of June and July 1958, with the group working out of Eureka harbor. The first of five trips was taken on June 11. This trip aboard a forty-foot chartered vessel, the "Sea Gull," was a preliminary shakedown cruise and took place entirely inside Humboldt Bay. The second cruise was taken on June 19 off Samoa and was likewise a shakedown cruise to check equipment and to establish shipboard procedures for hydrographic casts and plankton tows.

Three cruises were then taken on June 25, July 2 and 11 respectively. Wind and high

seas did not allow the completion of all the stations planned for cruise 5, but otherwise cruise plans were successfully fulfilled. Standard depressor-type stabilizers used on salmon trolling vessels were used to ease the roll of the "Sea Gull." This valuable contribution which furthered the safety and efficiency of shipboard operations was made by Paul Pellegrini, captain of the Sea Gull.

These offshore studies were concerned mainly with the physical and chemical characteristics of the overlying waters of the study area. Hydrographic stations were taken along three lines.

These lines were established for the following reasons: off Trinidad Head, the northern boundary of the study area because of the projecting nature of the coast at this point which may strongly influence the nature of the near-shore currents.

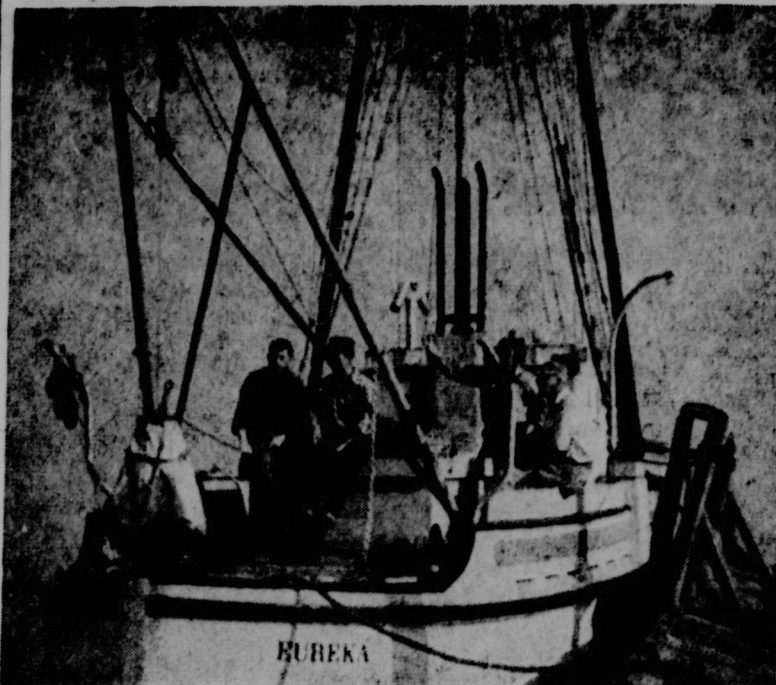

The second point located off the Samoa Split was made because it appeared to be a likely future site for marine outfalls.

The third point was located off Centerville, south of the mouth of the Eel River, which is the southern boundary of the study area. This point was important because of the Eel River Canyon, whose topography may influence the oceanographic picture along the entire study area, extends close into shore.

Surface water samples and sub-surface samples were taken with standard limnological and oceanographic water sampling devices. These devices can be seen in the labs at the Wildlife building. The results of the physical and chemical studies of the near-shore waters were presented graphically, and the original data was listed.

The on-shore studies involved sampling of intertidal animal populations at four stations, lithological studies at these four stations, and studying the razor clam population at Clam Beach.

As the study is now only in its initial phases, no recommendations or conclusions are warranted at this time. The data presented will become meaningful when it is integrated with observations extending over a much longer period of time than the two months cov-

Crew members test an orange peel type bottom grab for collecting invertebrate animals from the ocean floor. The vessel is the Seagull chartered by the college for the oceanographic study off Humboldt Bay for the State of California Water Pollution Control Board.

ered by this report. The next annual report which is due on Aug. 30, 1959, will include the variations in the physical, chemical and biological properties of the near-shore waters for a period of one year.

This program is one of three currently being studied by Humboldt State College. The other two projects are being carried on by John De Witt, associate professor of fisheries and Dr. Ernest O. Salo, assistant professor of fisheries. The program under De Witt is an aquatic insect study under a United States Public Health Service Grant. A Wildlife Conservation Board grant sponsors the Big Lagoon project which is being headed by Dr. Salo.

These programs are only a sample of what the fisheries program offers to its students. The fisheries program was bolstered in 1956 by the initial use of the new hatchery and Wildlife Building located on campus.

The facilities of the hatchery consist of six fish-rearing ponds, two concrete raceways, one earthen pond, and a modern hatchery for laboratory work. In 1956 the first Master of Science degree was offered in Fisheries Management.

At the fall semester registration, there were 65 students enrolled in the program. Of these 17 were freshmen, 6 were sophomores, 19 were juniors, 15 were seniors and 8 were graduates.

At present these are no plans for expansion, but the program will participate in the over-all college expansion. The most likely possibility is the proposed establishment of a marine resources station to be located near Humboldt Bay or Trinidad Head. With this development there is the possibility that additional courses might be added to the curriculum because of new facilities, but otherwise no major additions are contemplated.

EDUCATION MEETING

All students enrolled in Ed 2, 102, 113 and 175 must attend a meeting Tuesday at 12 p. m. in the College Elementary School auditorium. Attendance is necessary to complete information forms for the Division of Education and Psychology.

Griffith Named To Organize Jordan Schools

DR. HARRY E. GRIFFITH

Dr. Harry E. Griffith, professor of education, has been invited by the International Cooperative Administration of the U. S. State Department to serve in a 24-month Teacher Education Mission to the Hashemite Kingdom of Jordan.

The mission, composed of five to six top U. S. educators, will organize three separate schools for teacher education, including programs for elementary teachers, secondary teachers, summer session study for secondary teachers and an in-service teacher education training program.

Dr. Griffith will ask for a 24-month leave of absence from his duties at Humboldt State College and plans to report for duty June 1 in Washington, D. C., where he will join his co-workers for a period of orientation before sailing for the Middle East. His wife and family will accompany him.

This will be the second overseas education mission for Dr. Griffith. He spent several months in Japan as an education officer immediately following World War II. Dr. Griffith and his wife, Mrs. Beverly Griffith, who serves as the college nurse, have made their home in Arcata since 1939. Dr. Griffith has been a member of the faculty continuously since then, with the exception of a four-year military leave during which he served as a major in the Army Air Force.

Physics Majors Join Major Coast Industries

Six seniors majoring in physics have completed work for their Bachelor of Science degrees at the end of the fall semester. They will receive their degrees at the spring commencement exercises, but in the meantime five of them have accepted positions with major West Coast industries. The sixth plans to continue further studies at HSC.

Mike Berker has accepted a position with the Astronautics division of Convair at Vandenberg Airbase, Santa Maria. He and his wife, the former Ann Sorenson, Arcata, left Saturday for his new post.

Ronald Fuchs will be employed with Boeing Aircraft Company, Seattle. His wife is the former Ann Peithman, daughter of Dr. Roscoe Peithman of the HSC physics department.

Robert Tiller and Leo Faust will take positions with the Hanford Atomic Products Operation of General Electric at Richland, Wash. Mr. and Mrs. Tiller, the former Darlene Antilla, became the parents of a son last week and will delay leaving Arcata until Feb. 1.

Jerry Long will become associated with the Civil Aeronautics Administration of Los Angeles. Ted Luick plans to take advanced studies in mathematics this semester.

The six are the first graduate physics majors in two years, and according to their faculty advisers, Dr. R. E. Peithman, Charles Parke and Lester Glendenning, opportunities for employment in major industries of physics graduates are at an all-time high.

Group Discusses Radiological Survey In Area

The possibility of opening a research project that would include a radiological survey of the Humboldt Bay area was discussed last week between representatives of the California State Water Pollution Control Board and HSC officials.

The group met in the office of President Cornelius Siemens and included William G. Shackleton, pollution board executive officer; Dr. Harry MacGinitie, chairman of the division of natural sciences; Wendell H. Candland, engineer of the pollution board and Dr. Charles Yocom, chairman of the division of natural resources.

The officers met to explore possibilities of establishing a research project in the Humboldt Bay area with findings to be correlated with data from a nationwide network of radiological surveys. These surveys will be used to establish a monitoring system for peacetime atomic energy projects. The studies could be augmented by establishment of the proposed HSC Marine Biology Station below Trinidad.

Also discussed was the possibility of using oxidation ponds of city disposal systems in the coastal area as rearing ponds for fish, to utilize as fish food the insect type life that grows in the ponds.

Sponsors of the research projects, to be administered by Humboldt State College, would be the U. S. Public Health Service, the California State Water Pollution Control Board and the U. S. Civil Defense.

How They Will Look Before Long

Pictured above are architect's drawings of the new Speech-Arts Building (top) east elevation, and two dormitories (bottom). Completion is scheduled for next fall. The dormitories, Sunset Hall for women and Redwood Hall for men, will each house 200 students. The Speech-Arts Building, which will house the Sequoia Theater, will also accommodate classrooms for journalism, forensics, radio, costume design and workshop, and other related classes.

Student Recital Slated Feb. 8

Members of Mu Epsilon Psi music honorary have initiated a new campus service project which they hope will become an annual affair.

The group will present eight upper division music majors in a student recital on Sunday, Feb. 8, at 8 p. m. in the Music Building. Featured will be Joe Chappelle, trombone; Claudine Ray West, voice; Vernon Ludwick, violin; Barbara Soulligny, piano; Judy Packard, piano; Keith Anderson, clarinet; Iris Osborne, bassoon, and Jeanette Dick, voice.

The recital is open to the public and there is no charge for admission. Members of Mu Epsilon Psi will act as ushers, and refreshments will be served at intermission.

Gordon Bertsch, junior of Leta, is president of MEP.

Patients "Adopted" As Club Project By Phoenix Members

An interesting club project, carried out by the Phoenix Club, has been noted among recent club activities. The membership of the Phoenix Club is made up of older women students who have returned to school after an interim of work in business, the home, or other pursuits. This group decided "to adopt" a unit of the State hospital for women at Talmage as a Christmas project. The superintendent of the hospital was consulted, resulting in the number, the ages, and the Christmas desires of each of the patients in the unit. As a pre-Christmas meeting of the club, held at the home of Miss Hazel Hagne, co-faculty adviser to the group, each Phoenix Club member took the responsibility of becoming Santa to one of the hospitalized patients.

The result, a large, beautifully wrapped gift assortment was mailed to the hospital just before the holidays. A reply this week from the superintendent assured the Club of the success of their project!

The Phoenix Club invites all older women to attend the informal meetings of the group. They meet regularly every other week, alternating Wednesday and Thursday noons, in the reception room of the Dean of Students office. Miss Kate Buchanan and Miss Hagne are the faculty advisers to the club.

Humboldt Included In Budget; Construction Plans Proceed

Upon learning that Governor Edmund G. Brown's budget included more than two million dollars for construction projects at Humboldt State College, President C. H. Siemens this week stated, "We are very pleased to hear that all of our requests for 1959 were included in the budget. Now we know we can proceed with our master plan construction program. With more than 2,500 students expected by the time these new buildings will be completed, we are assured that the facilities will be ready for them."

The education-psychology building (\$663,500) will give the college for the first time a permanent building for its teacher education program, one of the college's major objectives since its beginning. It will be located to the south of the campus conveniently near the College Elementary School.

The forestry building (\$485,900) will house a rapidly expanding new major in forest management in which a hundred students are now enrolled. This will be a redwood building located across 17th street from the wildlife facilities.

Funds for science equipment (\$563,000) will be used to furnish the new physics and chemistry building which was financed last

year and will be under construction this summer. Soon Humboldt State College will have the laboratories and staff to train more scientists and to permit graduate work and faculty research.

Another project (\$160,500) will rebuild Redwood Bowl and increase the size of the football field, provide a new track with more sprint lanes, and standard facilities for field events. Additional public restrooms will also be added.

It is also anticipated that the budget will include funds for necessary site acquisition and a number of minor construction projects, such as the remodeling of the Main building.

Faculty On Carpet; Royal Carpet, That Is . . .

Four faculty members have been nominated by the Newman Club to vie for the titles of King and Queen of the Mardi Gras. The club will sponsor the annual ball Saturday, Feb. 7, in the Women's gym following the HSC-Gonzaga basketball game. Dancing will be until 1 a. m.

Competing for the crowns are Mrs. Evelyn McCurdy and Mrs. Kathy Goetz and Prof. Charles Fulkerson and Prof. Gordon Schroeder. Students will vote next week in the Administration Building hall for their choice, and the coronation will take place at the gala ball.

Prizes will be awarded for the best costumes, and students were urged by the club to be in costume. However, costumes are optional.

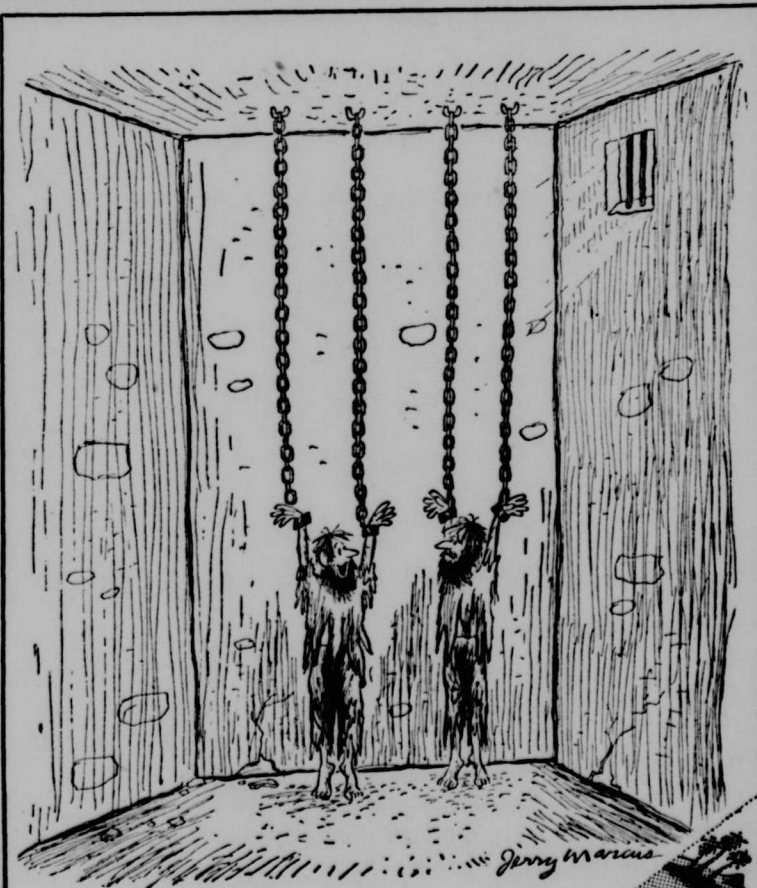

No ticket pre-sale is being conducted this year. Admission will be 75 cents stag and \$1.25 a couple. The Melodians will provide the music.

General co-chairman are Kathy Katri, Robert Giutoli and Josie Fagundes. Committee members are Jack Schillpleck, clean-up; Sandy Lawrence, Mary Jean Campbell and Cathy Cahill, decorations; Susanne Banducci, tickets; Gary Timmons, king and queen contest; Loretta Finan, band; Jerry Gould and Ruben Segura, publicity.

The Newman Club promised "plenty of decorations in the festive Mardi Gras mood."

Second Annual Ring Show Set

Wrestling Team to Test Chico State In Home-and-Home Meets in February

A home and home wrestling schedule with Chico State has been arranged for the HSC mat squad's debut into intercollegiate competition.

The Lumberjack grapplers will meet the Wildcats at Chico on Feb. 19 and will stage the

home match as the preliminary to the Humboldt State-Southern Oregon basketball game on Feb. 28 at 7 p. m. Eight events will be on each card.

Among a number of promising wrestlers expected to show well for Humboldt are Armand Baradat in the 130-pound class; Ron Kunstal, 147; Al Frakes, 155; Mike Stone, 165; Phil Butterfield, 175, and Pat Morrow, 181.

John Bobell, outstanding grappler from last season, who won the Fifth Naval District championship and was runnerup in the Atlantic Coast naval championships, has dropped from school, however.

Most of the HSC wrestlers have had either service or high school experience.

Coach Gordon Schroeder invited interested students to sign

up for P.E. 8. Regular class time is Tuesday and Thursday at 3 p.m., although the grapplers are working out daily at noon. Students may come at the regularly-scheduled class hour if they cannot arrange to meet noon practice sessions, Schroeder said.

Meanwhile, Coach Bob Doorink also invited interested boxers to sign up for P.E. 8 in hopes that at least the nucleus of a boxing squad can be formed this semester.

Big Ten-Bout Program Being Arranged Here For Feb. 17

The second annual HSC boxing-wrestling show will be staged in the Women's Gym Tuesday, Feb. 17, at 8 p. m.

Coach Gordon Schroeder announced that another outstanding card of ten bouts is being planned. These will include regular feature boxing and wrestling matches plus the hilarious events such as the mad scramble that was promoted last year.

Schroeder and Coach Bob Doorink this week put out a call for any students interested in performing on the card. Boxers and wrestlers should contact Schroeder as soon as possible.

Last year some 300 fans turned out and Schroeder expects that considerably more will show up at this year's show because of the popularity of the initial bouts. He emphasized that the show is not a "smoker" in the usual sense and that both men and women should enjoy the bouts.

Prices for the matches tentatively have been set at \$1 general ad-

mission and 50 cents for students. The program is not subsidized by student body funds.

Oxygen Study For Fish And Flies To Aid Anglers

Sports anglers casting their lines in Pacific coastal streams may soon add another trick to their art — checking with the latest oxygen reading of the stream they plan to fish.

If they do, it will come as a result of a research project now being carried out in the Humboldt State College fishery labs by Prof. John DeWitt. The HSC professor is experimenting to find the amount of oxygen required by insects such as the Mayfly and Stonefly, whose nymphs are hatched and bred in coastal and mountain streams. These insects, as any good dry-fly fisherman will tell you, are favorite items on the menus of trout, salmon, and other game fish.

In his studies, being carried out under a research grant from the U. S. Public Health Service, Prof. DeWitt hopes to discover at exactly which point a stream, depleted of oxygen through pollution, becomes too low in oxygen to be suitable for the insects. He reasons that if these are no insects to feed on, the fish won't be around either — no menu, no customers. On completion of his studies, he hopes to be able to predict whether or not a stream has a good or bad fishing potential by measuring its oxygen level.

Prof. DeWitt began his studies last year under a USPHS research grant. He is currently working under a second grant in the amount of \$3680 which will extend through Dec. 31, 1959. The second grant has been awarded because of the encouraging progress in his work last year. He is being assisted in his studies by two seniors majoring in fisheries, Ken Cuneo and Bob Ringo.

Back To The Grind For Humboldters

Registration for the spring 1959 semester at HSC was completed Tuesday and Wednesday. And, instruction began Thursday. The semester will run until May 29 with graduation scheduled for May 31. Easter vacation will be held from March 23 to 30.

Program changes may be made beginning next Monday, it was announced by the Registrar's Office. Students who find it necessary to drop or add courses may do so at that time. Program changes will be made in room 105A of the Administration Building. Students must first consult their advisers before making any change.

The final date for late registration is Feb. 11. Students who register late will be charged a fee of \$2 for this service. Late registration can be completed at the Registrar's Office.

Chico Downed; Gators Tonight

HSC Takes Two From Cats
65-51, 66-61

Humboldt State's basketball fortunes soared last weekend when the Jacks took a two-game stand from visiting Chico State.

Coach Franny Givins' five opened Friday night annexing a 61-51 win and held back a Chico rally on Saturday night to edge the Wildcats 66-61. The two wins put the Humboldters in third place in the Far Western Conference standings.

Two players stood out on successive nights with Joe Johnson showing the way Friday, followed by Eddie Thomas. Johnson tanked 22 points and the Jacks on both boards while Thomas hit for 21 on Saturday to give Humboldt its scoring punch.

The Lumberjack five moved out quickly in the opener and were out in front 21-7 with ten minutes played. The young Chico cagers began to score and the Humboldt margin was shaved to 37-25 at the half. With less than 12 minutes remaining Humboldt had a definite winning edge as the score stood at 52-37. However, the hard fighting Cats came back, this time within seven points. Humboldt then stalled to end the Chico threat.

On Saturday the frosh-laden Chico quint made the Lumberjacks fight off a tight second half rally in order to win. Humboldt ended the half with a 36-24 advantage but the heart of the game remained to be played.

The two fives traded baskets until Chico began a drive that ended with a 45-45 deadlock. The Cats then took a slim lead and the Humboldters came back to lead but Chico had more fight and emerged with another lead which Humboldt took back. With less than two minutes remaining Humboldt duplicated the opener and went into a successful game-winning stall.

Throughout the two game series the two teams were very even with Chico taking the shooting average and rebounding laurels for the second game while Humboldt had the edge during the opener.

SPORTS

Humboldt Hosts Powerful Gonzaga Five, Tall 7' 3" Jean LeFebvre

Humboldt State plays host Saturday, Feb. 7 to the Gonzaga University five of Washington and their big 7' 3" center Jean LeFebvre.

The game includes two against against top West Coast powers. The second will be against St. Mary's of the West Coast Athletic Conference who is favored to take that loop which includes COP, USF, and other tough cage powers.

On the seventh the Lumberjacks find themselves against the tallest collegiate player in the United States. LeFebvre is from France and playing his sophomore year of ball.

In his frosh year the tall pivot man broke the school's scoring record with 50 points. His favorite shot is the one hand jump. He has a remarkable 47.6 shooting percentage.

The highly publicized Gonzaga star has outshone his team mates to the extent that little else is known about the starting five except they have won a large number of games since LeFebvre's advent at the university.

Students are warned that for this contest only 800 students will be allowed to attend the tilt on their student body cards. After the free 800 bleacher spots are filled everyone must purchase ducats for the game. Beginning next Monday tickets may be obtained through the student body card at the bookstore, the business office or the dean of students office.

The game is slated for a 9 p. m. tipoff with a Junior Jack preliminary game.

IN THE SWIM

(Continued from Page 1)
ing rooms in the gyms. The remodeled locker room in the annex to the Women's Gym, used last semester by the football squad, will be used this semester by women swimming students.

A suit check-out room, however, has been built into the pool building.

The most modern filtration, chlorination, circulation and heating equipment has been installed. A new full-time employee, Lewis Judas, has been hired to run the pool system and make the necessary water purification tests.

Final painting and touch-up work will be done early this summer.

The fieldhouse is unique in California state colleges, most of which have asked instead for large turf areas. The building will allow activities to be carried on under a roof that in dry weather would be done outside.

Half the size of a football field, the Fieldhouse will accommodate football, archery, softball, hockey and baseball. The roof at its highest point is 50 feet high, and the dirt floor is large enough to accommodate a regulation baseball diamond.

The fieldhouse is constructed with laminated wood beams forming the roof with arches 220 feet long. The building will be lighted with 470 fluorescent tubes.

Jayvees Take Two Hoop Wins

Humboldt State's junior varsity basketball squad scored victories in both games last weekend, played as preliminaries to the varsity tilts. The Jayvees won over Ned's Nen's Wear of the Arcata Adult Recreation League 55-47 on Friday night and dropped the Centerville Naval Station five 61-37 Saturday night.

In the upset win over Ned's Humboldt led throughout although the opponent's roster was studied with former HSC hoop luminaries. Jerry Paul scored 18 points and George Ibareta 17 for the losers.

Jacks Play Must Win Series With San Francisco Cagers

Humboldt State basketballers travel to San Francisco to meet the Gators in a two-game series this weekend which could put one of the teams out of the running for the Far Western Conference race.

Next Monday the Lumberjacks will travel on to Moraga where they will hit head-on with the St. Mary's Gaels. The galloping Gaels are currently leading the WCAC and have a startling won-loss record for the top competition they have played this season.

The St. Mary quintet will undoubtedly be one of the roughest the Jacks are to face this year. In fact, St. Mary's and its sophomore ace Tom Meschery has been rated as one of the top two teams on the West Coast. Meschery was injured in the early part of the campaign when St. Mary's lost the bulk of their contests.

San Francisco has been unanimously installed as the team to beat but University of Nevada's Wolfpack, an early season favorite, has returned to the limelight after taking four straight conference wins, including two from the Golden Gators.

Meanwhile runnerup in the pre-conference Far Western Christmas tournament, the Humboldt Lumberjacks dropped two to the Sacramento State Hornets and returned to the hardwood last weekend after finals to win a pair from Chico State. Nevada remains the unbeaten team and should either San Francisco or Humboldt go by the wayside, the Wolfpack would seemingly have an easy inside path to the conference championship.

In the playoff for the tournament crown, Humboldt found itself pitted against the same Gator five which now threatens their running for the league crown. San Francisco caught the Jacks in their inand out "ice box" and downed the Humboldters 43-31 and went away as the tourney champs.

San Francisco boast three top conference players in guards Jim Caranica and Bill Aires. Aires, recognized as a "coach on the floor," is the team's leader and Caranica took the tourney most valuable player award as well as

being the Gator's top scorer. In San Francisco's near upset of USF, long a West Coast cage power, Caranica hit plus 20 and kept the game in doubt throughout. For his yeoman efforts, he was voted West Coast "player of the week," by sports scribes. Other starters include Mahlon Harmon, a young 18-year-old frosh who has capably moved into the pivot position. Forwards are Bill Purcell and John Christgau, who have shown considerable ability in their opening rolls.

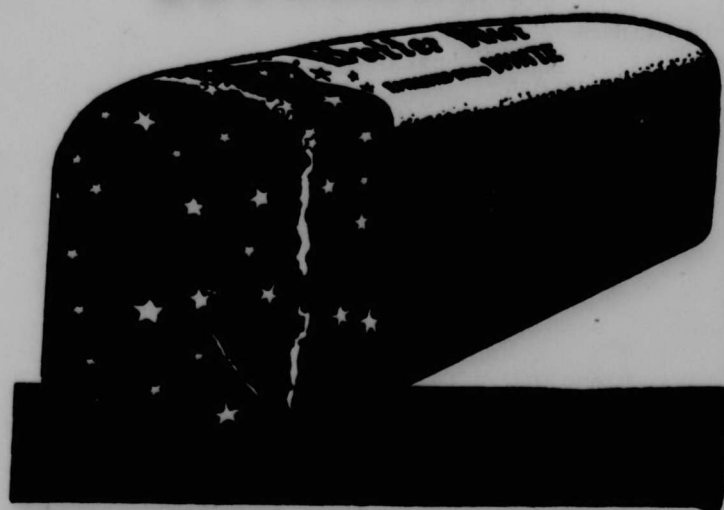

Humboldt hopes rest upon the sharp shooting of big Joe Johnson and Eddie Thomas, who have usually carried the brunt of the Lumberjack scoring attack. Johnson, one of the best FWC rebounders, has developed into a top scorer since coming off the gridiron in late November. Thomas will open with Billy Caver at the guards with George Milionis sharing that spot. Forwards will include Johnson and Joey Miller. Center will be Grant Erhart. Other players who might receive calls for action on Friday or Saturday night include two top frosh from Eureka High, Bill Chrichton and Larry Krupka. Jerry Hathaway, a member of last year's edition of Humboldt basketballers, is reported back in the fold and should enhance the Jack bench and may possibly see action this weekend.

Forensic Squad Demonstrates Speech Ability

HSC's mid-year touring forensic squad returned weary but happy last weekend after a three-day stint demonstrating debating and public speaking before student body assemblies at north coast high schools.

The itinerary began Wednesday, Jan. 21, with two hour-long programs of individual events at Arcata High School featuring Ron Edwards, Doug Kane, Bernard Mouton and John Rawlinson. The same afternoon Ron Edwards and Doug Kane debated against Karl Harber and Ed Spencer at St. Bernard's High School.

A quick trip to the airport to greet S. F. State squad members Clayton Mogeridge and Jim O'Sullivan was followed by a briefing session at the college in preparation for the balance of the tour.

The first stop on Thursday found Rawlinson and Spencer edged by Mogeridge and O'Sullivan in an audience judged debate demonstration. The HSC debaters returned the favor against the same SFS pair later in the day at Fort Bragg High School. In addition to the debate demonstrations before high school college prep classes Bernard Mouton and the HSC-SFS debaters provided two hours of extemporaneous speaking and oral interpretation.

On Friday the program format was changed to include one-man cross-examination debate between O'Sullivan and Kane at South Fork High School and between Mogeridge and Spencer at Fortuna High School. Tom McGowan joined the speakers at Fortuna with a humorous reading while the tour veterans continued the other demonstrations.

Forensic directors Milt Dobkin and Edward Steele continued the journey south to the University of Santa Clara for Saturday meeting of the Northern California Forensic Association with Mr. Dobkin presiding and Dr. Steele serving in his position as secretary-treasurer of the league. The group voted to sponsor the second annual HSC Pentathlon which will be held on May 8 and 9. The outstanding student speakers of the association colleges are expected to participate.

First event in the spring semester schedule is the Portland State College Town Meeting competition for forensic squad members Feb. 14-16.

A-V Staff Attend State Conference

Dr. William Ladd, coordinator of audio-visual services, and Prof. Jean Stradley of the department of audio-visual education, left Wednesday for Los Angeles where they will attend a state conference of the California Association of Audio-Visual Education.

Prof. Stradley is slated to present a paper on audio-visual instruction before the Research Division of the convention.

At the invitation of the State Department of Education, Dr. Ladd will attend a series of special sessions in which state college audio-visual coordinators will discuss the scope of the Federal Defense Education Act.

The two will return to Arcata on Saturday.

L&M is
Low
in tar

with
More
taste to it

Don't settle for one without the other!

"L&M is kindest to your taste because L&M combines the two essentials of modern smoking," says TV's Jack Lescoulie. **LOW TAR:** L&M's patented filtering process adds extra filter fibers electrostatically, crosswise to the stream of smoke... makes L&M truly low in tar.

MORE TASTE: L&M's rich mixture of slow-burning tobaccos brings you more exciting flavor than any other cigarette.

LIVE MODERN...CHANGE TO MODERN L&M
