REAGAN MEETS WITH STUDENT LEADERS

Tuition, Budget STATE COLLEGE To be Discussed MCATA, CALIFORNIA

Governor Ronald Reagan is meeting at 3 p.m. today in Sac-ramento with student body presidents of the California State Colleges.

Topics to be discussed at the meeting include the budget, tuition, faculty salaries, fiscal autonomy of the Board of Trust ees, and the proposed name change of the California State Col-leges to California State Universities.

The meeting was announced early last week by Kit Case, student body president from Sacramento State College, who sent letters to the presidents of the other 17 state colleges. urging them to attend.

John Woolley, A.S. President at Humboldt, said he has decided not to attend the conference, because he has reason to believe it will not be as worthwhile as previously anticipated.

Woolley said Case told him over the phone that the conference was scheduled to last only one-half hour, during which time the students simply state their position on the topics at hand, with the governor receiving their nts and little or no act-

ual dialogue taking place. Woolley said, "A half a day wouldn't be enough time to ade-

quately state our position." Woolley also said that Case nended he come to Sacra-1000 mento Monday morning and stay for about three days, during which time there would be a number of formal and informal

meetings between students and state legislators. But Woolley commented that his academic schedule will not allow him to take that much time off, and felt that if he stayed in Sacramento less than three days, his trip would accomplish very little.

Woolley was encouraged by the scheduled meeting, however, saying that by calling together state college student body pres-idents for a conference, "the governor recognizes the worth of CSCSPA(California State College Student Presidents Association)."

In recent weeks, Woolley has questioned the value of HSC's membership in CSCSPA. but has since clarified his views to indicate he feels a great deal of benefit can be obtained by

Tidwell to Speak Thursday Night

Pr. William L. Tidwell, Cal-Fr. William L. Tidwell, Cal-ifornia State Employees' Assoc-iation State College Academic Consultant (on leave from San Jose State College faculty) vill be on the campus Thursday overing March 16, to speak and answer questions on "Latest Developments on the Collective Description form the Toilties belonging to the organization, but not necessarily by attending **CSCSPA's** quarterly conventions.

Teacher Placement Changes Announced

Educational Placement, the arm of the Placement Center concerned with teacher placement, has announced a change in procedure designed to speed up notifications on possible openings.

Previously, teacher candi-dates have been contacted personally with notes in their individual boxes, but it was found that this was time-consuming from the clerical point of view, and also, the student box situation frequently led to the stud-ent missing the notification, reports Mrs. M. L. Humphery of Teacher Placement.

From now on, said Mrs. Humhery, the teacher candidates will receive a monthly schedule of on-campus recruiting. Bulletin announcements will remind them of approaching dates, the Lumberiack will carry the wesk-ly schedule, and Ell position notices will be posted in the Placement Center.

Mrs. Humphery said that the new system is designed to give the student a maximum opport-unity to keep aware of changing educational placement patterns, but it will put the responsibility with the student who must check with the office regularly.

Students are reminded that everyday brings new notifications of openings to the Placement Office, and since these lists are specific, they must be checked carefully.

New Fraternity To Colonize

Arcata, Calif.

Men interested in forming a new fraternity have the op-pertunity to do so this week. A representative from A representative from Signa Pi National Fraternity is visiting HSC with plans to form a Sigma Pi colony here. Sigma Pi is one of the

fastest growing, most pro-gressive social fraternities in the United States. Interested persons are urged to contact Paul Moore, Activities Adviser, in Room 2 of Nelson Hall, East Wing.

Beta Chi Omega Name Chosen by **New Sorority**

The new sorority currently forming on campus has chosen the name Beta Chi Omega, reported the group's president, Miss Cheryl Bonano.

The name was chosen by the entire group from a list of Greek names compiled by a special committee.

At present the group consists of approximately 20 girls. Miss Bonano reports that membership will be open until March 27 for those still interested in joining.

The group is not nationally affiliated. The members plan to become a well established local sorority before they choose a

national sorority with which to become affiliated, said Miss Bonano.

They have drawn up a con-stitution to be approved by ASB and have elected officers.

Miss Bonano added that they are currently plauning fund raising and social activities. The group also plans to enter the Spring Sing during Lumberjack Days.

Meetings of the Beta Chi O-mega are held every Thursday in the East Conference Room of the CAC at 4:00. Miss Bonano urges all girls interested to begin attending these meetings.

Numerous Job Opportunities In Growing Geography Field

There are numerous job opportunities in the field of geography, reports the College Information Service.

Currently, 100 students are enrolled in the new Geography program here, which consists of eight course offerings, six of which have not been offered before. The new courses range from Physical Geography to several regional courses, such as Asian, Middle Eastern, and Northern African Geography.

Along with the new courses. the Division of Social Science has two new geographers, Professor Alvar Carlson who came here in the fall from Minneapolis. and Professor Jonathan Lu, from Seattle.

As more students enroll and learn about the almost unlimited possibilities for employment, the Division hopes to enlarge the curriculum to a full major leading to the Bachelor of Arts degree.

Professor Carlson maintains that while schools in California are rapidly expanding their geo-graphy curriculums, even in the elementary grades, not enough people are aware of the diversity of professional openings. Professor Carlson said that many people have the idea that geography is only a study of place names, while in reality it involves knowledge of the whole of a region. The geographer must understand the cultural environment as well as the physical environment.

No. 24

Carlson went on to say that with this broad background of training, a geographer can choose from a number of careers, such as locational analysis, economic research, map making, regional specialization, urban planning and many more.

Current job listings by the National Association of American geographers indicate that a graduate with a major in geography can take his pick of employers, including cities and counties, which need planning personnel; the Army Corps of Engineers, which wants graduates for map analysis work; the Central Intelligence Agency. which is calling for photo interpreters and regional specialists; various governmental agencies wanting research analysts; the Library of Congress and a host of private companies which hire locationalanalysts and economic researchers.

According to Humboldt's two new professors, nationwide enrollments in geographical stud-ies are increasing as more stud-ents become aware of opportunities in the field.

KHSC's Sequoia Concert Selections Announced

Following are the concert selections, selected by Pro-fessor H.C. Fall of the music department, to be featured on Sequoia Concert nightly - this week - at 8:30 p.m. on KHSC-FM. TUESDAY

Brahm's A German Requiem, OP.45

performed by the Philadelphia Symphony Orchestra conducted by Eugene Ormandy and featur-ing Phyllis Curtin, Jerome Hines and the Mormon Tabernacle Choir.

The concert will conclude

work for piano arranged for or-chestra by Edmund Rubbra. WEDNESDAY

Julian Bream, guitarist, is featured in BACH's Lute Suite #1 and Lute Music from Royal Courts of Europe. THURSDAY

National Educational Radio presents: Piano Sonatas of Haydn and Hall of Song. FRIDAY

A program of Spanish songs, sung by Montserrat Caballe, Spanish soprano. Selection titles are: Canciones Amatorias,

rgaining Issue, the Tui Proposal and the State Budg ---

Dr. Tidwell will speak at 7:30 p.m. in the Wildlife Building Auditorium and will also be available for informal discussion with college personnel from 3-5 in the afternoon in the Founders Hall Faculty Lounge. Dr. Tidwell is headquartered in Sacramento and is well qualified to report on current trends in the news emanating from the Legislature and state administrative circles, as well as on developments involving the collective bargaining movement in the California State Colleges. Humboldt State College Chapter 151 of the California **State Employees' Association is** inviting all interested college personnel to hear Dr. Tidwell speak at the evening meeting and to meet him informally during the afternoon.

Fugue on a theme by Handel, a

New Procedure for Kiosk

Many students are not really aware of the purpose, function, or even the name of the Klosk located between the Administration Building and Cafeteria.

At least this is the belief of the Activities office which is now in the process of publicizing the New Kiosk procedure, approved by Student Legislative Council last Tuesday afternoon.

The weatherproof, lighted Kiosk, erected last summer, is to be used exclusively to post campus publicity material. The new rules governing its use are: 1. Of the four sections, (sides), one is to be used to

publicize ASB activities, one for club activities, one for coming events and calendars, and one for general information.

2. The maximum poster size is $8\frac{1}{2} \ge 11$ inches, except for special events.

3. Announcements will be posted on a first come, first served basis, and should be left in the Activities Office, Ad. 218

4. No political posters are allowed; however, club sponsored speakers may be publicized in the "club activities" section.

The Activities Office has urged all students to make use of the Kiosk and its publicity possibilities.

On Russian Growth

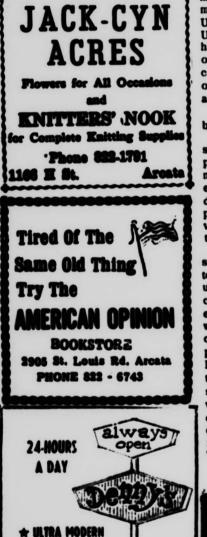

Lumberjack

by James H. Hollingsworth

The Soviet Union is second only to the United States in its importance as an industrial nation. It has increased its gross national product at a rate, since the Russian revolution, that is almost phenominal. It has become strong enough to be a direct challenge to the United States.

Is this proof, therefore, that the Communist system is the best system for obtaining growth and progress? The Soviet Union definitely has an advantage over any of the democracies of the West because it is able to prevent consumption inorder to accumulate capital needed for growth.

There are other things that have enabled the Soviet Union to achieve as much as it has, and none the least is the aid obtained from the West, especially the United States. When the Bolshevik Revolution of Novem-

* PROMPT

ber 1917 ended, the Russians repudiated their foreign debts, (20 billion dollars) and confiscated all private property. From 1921 to 1923, under the administration of President Herbert Hoover, an American Relief Administration distributed \$63,174,484 in food relief inside Russia.

In the first Five Year Plan beginning in 1928, hundreds of Russian engineers came to the United States for training, and hundreds of American engineers helped build the basic industrial complexes inside the Soviet Union. This included the steel works at Marnitogorsk, the largest Soviet motor-vehicle plant and the vast tractor factory at Stalingrad and the great Dnieper River hydroelectric dam.

During and after the second World War, the Russians re-ceived over 11 billion in Lend-Lease from the United States. systematically removed They most of the machinery from Eastern Europe where it was still usable, and 858 million in machinery from Manchuria. Immediately after the war, the U.S. gave 2.7 billion to the United Nations Relief and Rehabilitation program, over half of which went to Communist countries. This makes a total of over 33 billion alone in direct aid to the Russians since 1917.

George Kennan, a former ambassador to Moscow, has this to

say about one phase of this aid program: "The Soviet Government was, thus, importantly aided, not just in its economic undertakings, but in its political prestige and capacity for survival, by ARA's benevolent intervention.

Thirty-three billion may not seem like a lot of money in the total scheme of things, but when used for machinery and food, it can have a disproportionate effect. This aid came at times when Russia was on the verge of collapse; without that aid, Soviet progress would have been greatly reduced, if not reversed. If the Soviet Union is to be considered a great nation in the world today, much of the credit, or the blame must go to the United States. (Figures and quotations from U.S. News, March 13, '67. pp. 60, 61)

1311.24 **Coeds Refute Health Center Story** Editor:

LATARS

In reference to a recent article of March 7, 1967, written by a "Lumberjack" staff writer concerning the "Un-Health Center", we five would like to offer our experiences and opinions.

1. "Un-Health Center"? Does this wording imply poor sanitary conditions? If so, perhaps substantial proof would further legitimatize your astute "scientific" observations.

2. "It began with a 40-minute wait. . ." We grant that there is a long waiting period (one of us waited 50 minutes), however let us consider the size of the student body as compared to the available medical personnel. Humboldt State College's accurate enrollment figure for Spring 1967, is 3,430. A ratio of 1:686 is bound to restrict immediate medical attention, excluding emergencies of course.

This ratio, relative to enrollment, is representative of the five medical personnel in direct contact with the students: 2 doctors, 2 nurses, 1 laboratory technician. Consequently, if one is to receive personal attention from a doctor, the ratio, again relative to enrollment leaps to 1:1.715.

Therefore, we maintain that it is inevitable that a health center recipient would have to warm those "cozy" chairs of the waiting-room for a period of time. We would like to suggest that the writer of "The Un-Health Center" visit some of the clinics in Eureka. Clinics are notorious for long waits.

". . .a man wearing a long white apron whom I once heard called a 'doctor' ambled in." We profess that this statement denotes a tone of disrespect. We question the authority of the writer in making the value judgment implied by the quotation marks around the word doctor.

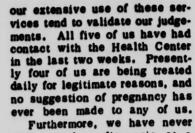

The standards and qualifications established by the American Medical Association merit the respect of graduate and under graduate students alike. Dr. Yost was graduated from the University of Cincinatti Medi-cal School. He served his internship at Portland Medical Center in Oregon and his residency in pathology at Portland. During World War II he served as a regimental surgeon. Dr. Yost practiced at the Oregon State College Health Center for six years before coming to HSC in 1964. where he is currently Medical Director of Health Services. Dr. Chain was graduated from

br. Chain was graduated from the University of California Med-Teal School at Beckely. He al-to served the the Army during World War. II in the Army during World War. II in the Army during Batistion and was present at Normandy on DiDay. He practic-ed in Function and a free ed in Eureka before and after the war and came to Jumboldt State College Health Center in 1964.

We are sure that the qualifications of the "real-life doctor" at Trinity Hospital are no better than those of either Dr. Yost or Dr. Chain What do you think?

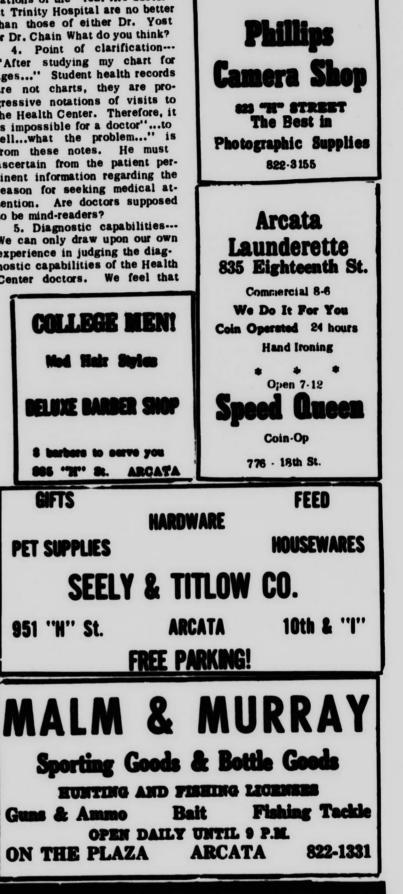

"After studying my chart for ages 'Student health records are not charts, they are progressive notations of visits to the Health Center. Therefore, it is impossible for a doctor"...to tell...what the problem..." is from these notes. He must ascertain from the patient pertinent information regarding the reason for seeking medical attention. Are doctors supposed to be mind-readers?

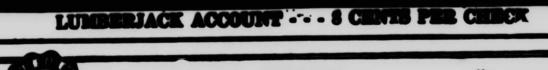

5. Diagnostic capabilities---We can only draw upon our own experience in judging the diagnostic capabilities of the Health Center doctors. We feel that

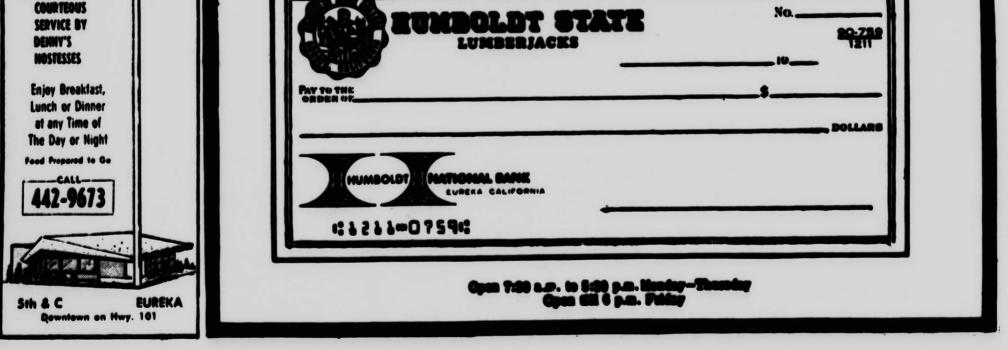

experienced a diagnosis at a

CONDUCTOR CHARLES FULKERSON, giving directions at a rehearsal session.

The Humboldt Symphony is holding an open house in Se-quoia Theatre on March 16 at 8:15 p.m.

Anyone interested is invited to come and meet the orchestra

to come and meet the orchestra and to watch a live television show-in-the-making. Symphony Director Charles Fulkerson said the event will be a Humboldt County "first," in which HSC Television Workshop will produce a 30 minute concert by the symphony. The show, "Here's the Humboldt Symphony," will be video-taped in the television studios of the campus station KHSC and will be microwaved to KVIQ (Channel 6) for public viewing on Sunday, April 2, at 2:30 p.m.

Mr. Fulkerson and Dr. Ander-

son of the Radio-TV department are inviting the public to attend a pre-film rehearsal beginning at 7:30 p.m. and the actual production from the theatre stage at 9 p.m. The informal evening will give visitors an opportunity to see how a television program is put together and produced.

Mr. Fulkerson says the symphony's program will include the Gavotte from Prokofiev's Classical Symphony, the Andante Cah-table movement of Tchaikovsky's Fifth Symphony, and three move-ments from Haydn's Symphony No.88.

Student producers of the show will be Duncan Dickson and James Wildman, technical directors, Del Hannon KHSC technician, will engineer the production.

New Coach Has High Hopes '67 Cinder Campaign For

by John Hunter LJ Sports Writer

Lamberjack

A new coach, a new event and a blend of old and new perners make up the 1967 edition of the Lumberjack track and field team that opens its season this Thursday at Chico State.

Coach Jim Hunt, a newcomer to the Humboldt campus, brings together a vastly improved team headed by returnees Pete Starman, John DeWitt, Mike Phillips and Gary Tuttle.

GAS m

We specialize in tires, shellubrication, and

just about EVERYTHING! Tip-top tune-ups, too.

Far Western Conference:

Backing up Tuttle will be Lettermen Phillips, the school record holder in the half-mile, John Scott and Dan Armijo in the one and three mile runs, and versatile Ken Lybeck, who will be doubling in the 440-yard dash and the mile.

Ironman Pete Sturman, who tied the school record of 15.3 in the 120 yard high hurdles at the recent Davis Relays, provides the experience in the hurdles. Bill Amden sen and Freshman Brad Brisban also promise to score points for the Green and Gold in the 120 yard highs.

Freshman Jeff Getty and Robert Trout provide the Jack's only hope in the sprints. Either Lybeck or Phillips will back up

Trout in the 440. Humboldt's hope in the field events suffered a severe blow when veteran discus thrower John Alcala was declared ineligible at the end of last semester.

However, seniors DeWitt and Sturman provide the Hilltoppers with a powerful one-two punch in the javelin. The pair placed second and fifth in the event at the Davis Relays.

The other field events consist mostly of inexperience but rapidly learning performers.

Freshman Gary Cremer and Senior Larry Miller con.prise the pole vault contestants while

letterman Norm Pillsbury gives the Jacks hope in the triple jum

Richard Kehl, with a best of 21 feet, is the Lumberjacks major threat in the long jump. In the weight department,

Marshall LeToumeau (44'11'') and Bob Clerico (42'4'') are the shot-putters, while Jim Eckert and Dennis Trotts will try to fill the void left by Alcala in the discus.

Despite their lack of experience in several events, Hunt thinks the Green and Gold spikers have a good possibility of finishing fourth in the FWC Nevada, Sacramento hind State and Davis.

Netmen Overwheim

Sonoma in Opener

The Lumberjack tennis squad opened its season with an impressive 9-0 win over Sonoma State here last Saturday.

After last week's initial win, Coach Larry Kerker's netters meet the tough Cal Aggies tomorrow at Davis.

The Jacks completely dominated the match by sweeping both the singles and the doubles

Letters (Continued from p. 2)

distance of greater than 3 feet, and the doctors' attitudes have always been those of empathy. concern, and friendliness. Addressing a student-patient as "dearie" only points out the professional informality that is characteristic of student-staff relationships at Humboldt State College. We feel that this in-formality is both desirable and beneficial.

6. Prescription of drugs....The cough syrup referred to as "sugar water" contains ambnenyl, benedryl, ammonium chlorid, sodium citrate, methol--shall we go on? Penecillin is not sup-plied without the student first seeing the doctor. Phenobarbi-tol must be signed for in accordance with the law set up by the Federal Drug Act.

The medications that the nurses pass out to the students who have not seen a doctor are referred to as "standing order medications." An example of this would be the coricidin tablets---well, you can go down to the hearest drug store and buy them over the counter. We include this to let the student know that the staff at the Health Center does exercise discretion in giving medications to the students.

We realize that the writer has voice prevalent popular attitudes concerning the services of the Health Center. This letter, therefore, is not intended to be a slam to the writer herself, but more a clarification of health center services and a statement of our opinions. We feel that students should be grateful that such medical services are available at absolutely no cost.
