

Humboldt Lumberjack

Humboldt Lumberjack, Wednesday, February 7, 1940

Two New Courses Being Given At Humboldt State

The addition of two new courses in industrial education at Humboldt State will make it possible for the college to put on three and maybe four years of the work required for an Industrial Arts Credential.

Under the direction of Charles J. Dreyer of Eureka High School classes in machine shop practice are offered at the Eureka High School shop.

Classes in welding and forging are being conducted at the Arcata Union High School shop where J. W. Boggess is in charge. These classes meet from 4 to 5 on Mondays, Wednesdays and Fridays.

Two units of credit are offered for the classes which meet six hours each week. Individual arrangements for part of the work may be made with the instructors in charge.

Regularly enrolled students at the college may take these courses by paying the nominal course fee for materials required.

Humboldt State feels grateful to Eureka and Arcata High Schools for putting on this expanded program of industrial arts.

'Bus' Foster Is Member of '400'

New York has its famous Four-Hundred; Humboldt State has its Four-Hundred too. Honors of becoming a member of "The Four-Hundred" this semester go to "Bus" Foster who registered early Monday morning to become the four-hundredth student enrolled at Humboldt State College. This makes the Spring enrollment the largest in the history of the college.

Last fall Ernest Sarina earned the distinction of being the first member of "The Four-Hundred" when he entered, making the enrollment reach the four-hundred mark for the first time in Humboldt history. There were 410 students attending college last semester.

Betty Sue Wilson and Jeanne Spetz, former freshmen students, have enrolled in the school of nursing at St. Francis Hospital in San Francisco.

H.S.C. TO CONTRIBUTE FOR RELIEF FUND

Humboldt State students will have an opportunity in the near future to contribute to the Finnish Relief Fund of which President Arthur S. Gist has been asked to be a member of the California committee. Further details will be published next week.

It is not felt that a college so situated as is Humboldt will have a large contribution fund, but it is felt that the students would be willing to contribute something to such a worthy cause even though the contribution be small.

Musicians Offer Music Scholarship

Money was obtained from proceeds of the Musicians' Ball to establish a music scholarship at Humboldt State for next fall. The scholarship will include tuition, fees, aid in supplying books and supplies, for a high school graduate who is primarily interested in music. It will be awarded at the close of the spring semester.

Applicants must have made a commendable scholastic record in high school, must enter Humboldt State the semester following the award which is for boys only. He must major or minor in music at the college. The award will be given to a student who has not been out of school more than a year.

The musician's committee for scholarship arrangements are Carl Owen, Chairman, John McNicholas, and Ernest Wagner.

EGGS TO BE PLACED IN TROUGHS SOON

By the end of the week the class in Hatchery Biology will be ready to put the salmon eggs in the four troughs loaned them by the Prairie Creek hatchery. These eggs are now in the "eyed" stage, that is, the eye spots can be seen. It will not be long after that until the fish will be hatched. After the fish have hatched the class will have charge of feeding them, cleaning the trough, and caring for any diseases of the fish.

The twelve students accepted in the class are Frank Saunderson, Herb Gomes, Al Wright, Walt Farley, Walter Monroe, Harry Manning, Marshall Rousseau, Merlyn Allen, Richard Tinkey, Axel Lindgren, Herman Jones, and Albert Simay.

Students Ski

Five college students went skiing at Spike Buck on Grouse Mountain nine miles east of the Humboldt Ski Lodge on Monday, January 30. Those who went were Leland Domeyer, Milton Carlson, Robert Frakes, Fred Price and Robert Bryan.

SKI FEES GO UP

At a recent Ski Club meeting the initiation fee was raised to \$1.50 plus the \$1.00 cabin fee and yearly dues. Plans were made for the girls in the club to go up to the club cabin over the weekend. Due to the rainy weather the girls' trip did not materialize.

New Requirement Offers Opportunity For Orientation

Forty freshman and sophomores are registered for the new course in Teaching Orientation. Approximately twenty of them will for the first nine weeks observe teaching in the lower grades with Miss Dorothy Williams, supervising teacher, demonstrating good methods of teaching.

The other half of the class will observe teaching in the upper grades with Mrs. Estelle Koch, supervising teacher, in charge of the children. At the end of nine weeks the two groups will change to the division as yet not observed.

In addition to observing actual class room work two days a week, each college student is required to spend one noon hour with the children at the college elementary school. Twenty minutes of the time will be spent in the cafeteria and the remainder of the hour on the schoolground playing with the children.

The chief purpose of this new requirement is to give students who think they would like to be teachers an opportunity to further analyze themselves as to whether or not they think they could become good, successful, and happy workers in that particular field. Another purpose is to afford the staff at the college elementary school an opportunity to get better acquainted with prospective teachers.

Hour Arranged For Verse Choir Class

Anyone who wishes to improve his speaking voice, appreciation of poetry, or teaching ability should be interested in the newly organized verse speaking choir which meets at eight o'clock on Tuesdays.

Choral reading is a revival of an ancient art of speaking verse in unison. Students are grouped according to voice quality and placement. Verse choir work is especially valuable to prospective teachers for reading in elementary and secondary work.

Now that the hour of meeting has been arranged, those interested are asked to meet with Mrs. Elma Folsom in room 200.

HOST AT PARTY

Harold Langdon was host Saturday evening to a group of Humboldt students at the home of his sister and brother-in-law, Mr. and Mrs. Ulice Lentz, in Arcata. Those present were Margaret Kay, Alberta Starkey, Patricia Bertrand, Leland Domeyer, Nadine Swan, Eugene German, Bob Frakes, and Charles Arnold.

SPECIAL FROSH RATE

A special rate was extended the frosh at the A.W.S. noon dance last Friday. Music for the dancing was furnished by an electric phonograph, but because of a misunderstanding concerning the records the dance didn't begin until quarter to one.

ENGLISH A TEST GIVEN THIS FRIDAY

There will be an examination in English A for those students who entered late or for some other reason did not take the test at the regular time this Friday noon in room 200. Mrs. Elma Folsom will conduct the examination.

The passing of the examination of the course in English A is a prerequisite to English 1A.

A.W.S. To Give Informal Tea

New freshman students as well as new women students will be honored guests at an informal tea which is to be given by the members of the executive board of the A.W.S. on Friday in the social unit.

Officers of the Associated Women Students who will act as hostesses are Rose Ivancich, president; Vivian Larson, vice-president; Ada Dean Regli, recording secretary; Hazel Hagne, corresponding secretary; Dorothy Hunt, treasurer; and Beverly Bullock, publicity manager.

Mrs. Monica Hadley, dean of women, and advisor for the A.W.S. will be a special guest.

STUDENTS ELECTED TO HONOR SOCIETY

Announcements of the students who have been elected to Chi Sigma Epsilon will be the main feature of the Chi Sigma Epsilon Honor Assembly which is to be held February 16th at 10 a. m. in the college auditorium.

Chi Sigma Epsilon, which is the upper division honor society, was organized in 1931 for the purpose of honoring students outstanding both in scholarship and activities. Members elected to the society last year were Valerie Barker and Jim Hall. Other members of last year are Myron Schussman, Ray Pedrotti, and Beryl Unsöld.

HELEN ARNOLD IS ELECTED PRESIDENT

Helen Arnold, high freshman at Humboldt, was recently elected president of the Kampus Ko-eds. Other officers chosen to serve for this semester are program chairman, Jacqueline Naggari; secretary and treasurer, June McCombs; publicity chairman, Rose Dare; social chairman, Alberta Starkey.

The election meeting was held at the home of Alberta Starkey. The girls also received their club pins at this time. Those present were Alberta Starkey, Dorothy Fountain, Joy Stockton, Beth Nixon, Irma Hugnin, Dorothy Hunt, June McCombs, Betty Jane Atwood and Rose Dare.

PARTY AT BIG LAGOON

Last week-end a group of Humboldt students were guests at the A. E. Vann cabin at Big Lagoon. Those attending the party were Valerie Vann, Katherine Niles, Doris Swisher, Nadine Vann, Betty Fay, Victor Lorenz, Alvin Pinney, Fred Duff, George Brenner and Bert Sanard. Chaperones were Mr. and Mrs. E. A. Vann.

First-Story Walls Of New Dormitory Soon Going Up

Work on the new dormitory has reached such a point in construction that every new addition shows up distinctly. At present all basement walls and first floor walls are completely poured. The first story walls of the north wing will be poured later in the week. Forms for the remaining first story walls are well under way. Electrical work, plumbing, heating, and ventilating work are progressing along with general contractor's work.

If the weather permits the building will be completed July 19th. After the roof is on most of the work can go on regardless of the weather.

The work so far is of a type which is essential to the safety of the building but has little appeal to the eye. This part of the construction consists of concrete walls with a curtain of reinforcing steel inside both faces of the concrete walls, reinforced concrete floor slabs, pipes for plumbing, and conduits.

At present there are about fourteen carpenters working on the forms, two men placing reinforcing steel, one electrician placing conduits for electrical wiring, two plumbers, one steam-fitter, and twenty-five men placing concrete.

Incidentally, the tall tower on Plaza Avenue is not to be a part of the main building, but is a temporary concrete tower for pouring concrete in the building. The concrete is mixed in the mixer, discharged into a skip or bucket which raises it to the

Continued on page four

FOUR PENNY NAIL AND WHAT IT DID

The drama department received its greatest shock of the year on last Sunday afternoon when Sadie Crnich, who shares the lead in "Brother Rat" with Vivian Larsen, came near to eliminating herself for the remainder of the present season. Miss Crnich was rehearsing the most touching scene of the show when without warning the play stopped with a crash. The cast and director rushed to Sadie's side and soon discovered that she had badly mangled her new silk stockings. The workshop carpenter was called in and after a hurried inspection of the tragedy found that a four penny single nail and a bench had caused the accident.

A flash from the department states that the destructive nail has been removed and that Sadie, who is badly in need of a new pair of stockings should be in shape for the premiere of "Brother Rat" on February 27.

All new students and entering freshmen must have a physical examination. Those who have not had this examination are asked to make an appointment this week with Mrs. Monica Hadley in the Health office, room 208. Mrs. Hadley is in her office daily from 11 to 12:15.

IN MEMORY OF

There is one man whom the students of Humboldt should never forget. He is a man who continued to work in the interest of the college even after he left public life. That man is Hans C. Nelson, former State senator.

In 1913 Nelson introduced the bill that led to the establishment of Humboldt State College. Following this initial step, he spent many years of work advancing the welfare of the college. He watched it grow, and always maintained a deep interest in its expansion as an institution, in its students, and in its service to northern California.

What could be more fitting than that we honor his memory by calling the new dormitory "Nelson Hall"? Truly an appropriate name for a beautiful building and the memory of a loyal friend.

Music Improves Students' Art Work

Music hath charm to soothe not only the savage beast, but, according to Professor George W. Eggers, Chairman of the City College of New York Art Department, it also improves the work of art students.

By means of a radio and phonograph in the department office studio and an intradepartmental communication system, City College art students have been listening to all sorts of music while busy with sketching painting, sculpture, lithography and photography. No longer do they whistle while they work, nor do they care to converse while their hands are busy. The soft strains of the music seem to ease nervous tension and the students accomplish more, in quantity at least, than formerly.

KARL'S**CAMPUS COMMENTATOR**

Well, pipples, here I am again. And—starting the new semester—we find more cute girls have enrolled at our fine institution!

Say, have you noticed how the boys around here open their eyes wide at the sight of Marjorie Cloney, Dot Johnson, Lois Johnson, Marg Waters, and Rosie Woodcock? Looks like an interesting semester ahead, eh fellas?

What blonde cutie seems to be the object of Bill Madsen's affections? And why do Pat Dillon and Chuck Gorbett (two new Frosh) like being together? Love, I betcha!

Seems lonely and quiet around here with the team making all those long trips around Oregon. We miss Rod Belcher and his personality, and Haven Howitt and "Bip" Bishop just because they are our friends.

We've been concentrating on an Ideal Boy and an Ideal Girl for Humboldt State, and in our opinion the girl would have the

Eyes of—Vivian Larsen
Hair of—Lucille Carroll
Smile of—Karen Wester
Personality of—Rosie Ivancich
Figure of—Monica Hadley
Clothes of—Elaine Johnson
Dancing of "Chris" Petersen
Scholastic Ability of—Valerie Barker
Character of—Hazel Hagne
Complexion of—Edith J. Davis

And in our opinion the boy would have the
Scholastic ability of—Vonnice Dunstan

Complexion of—Stanley Roscoe
Character of—Bud Villa
Eyes of—Henry Trione
Hair of—Cap Torp
Smile of—Bob Goss
Personality of—"Doughnie" Waters

Physique of—Gino Cassagrande
Clothes of—Phil Coons
Dancing of—Leon Flink
And in our opinion the ideal couplets around here are:

Joy Stockton and "Snooky" Edsall
Dorothy Fraga and Herbie Gomes
Helen Hartsook and "Miltie Wiltie" Villa

And now in closing, I want to ask you if you've ever heard a cuter one (excluding the "Confucious Say" series, however) than "What happened to the three lil fishies?—the dittum dottum!"

All you "stoogents" can now

Photography Enters the Spotlight As A New Field Of Study at HSC

Th tremendous and almost inexplicable increase in interest in photography within recent years brings this field into the spotlight in any study of career possibilities. Mechanical developments and improved technical processes are both a cause and an effect of this burst of interest. The increase in the use of pictures in newspapers and the publication of such popular pictorial magazines as "Life" and "Look" are in turn both a cause and an effect of the technical improvements. Likewise the outcropping of amateur photographers makes its contribution to the upbuilding of the industry and thrives upon its growth and development.

During the depression, photographers fared well, comparatively speaking. Not more than three or four per cent of the total number registered with the United States Employment Service were seeking employment.

This increase in interest means, of course, increased opportunities for careers as technical experts, journalistic photographers, salesmen, and operators, or manufacturers of instruments and supplies. On the other hand, it also means an increased number of prospective employables with the possibility that the field may become over-crowded in the near future. For this reason, it is well to bear in mind that preparation for an alternative profession or vocation may be part of the wisdom for camera addicts of today.

Half of today's photographers find their employment in studios either as owners or assistants. Most of these establishments are small, but provide a satisfactory income, depending upon the skill, business ability, and personality, of the owner. Most of the other half are associated with magazines, newspapers, advertising companies or commercial laboratories. There are a few successful "free-lance" photographers, and a few hundred are affiliated with the motion picture industry. This particular field, however, is greatly over-crowded and difficult to enter.

Incomes vary from \$10 to \$50 weekly for cameramen. In 1934, newspaper cameramen earned a median salary of \$33.86 weekly. Dark-room technicians may earn as much as \$50 per week, while while head printers sometimes receive \$75 for their work of prepar-

breath easily until next week when I'll be back with a gash and a crash with a flash and no cash!

ing the finished plate. Finishers receive from \$10 to \$25 for their work which requires much less skill.

At Humboldt, a student may do much or little in the field of photography as his talent or interest dictates. Dr. Lanphere's course in Physics 20 presents elementary techniques that provide the foundation for further individual work. Howard Barnes and Jim Hall are two Humboldt students who have accomplished outstanding work in this field, Barnes having secured employment as Ship's Photographer on one of the great "Dollar" liners.

Students expecting to work in this field should take Chemistry 1A-1B, Physics 2A-2B, and as many art courses as possible. Photography is a desirable elective for prospective teachers as it is part of the field of visual education which is being emphasized in the modern school, and also because it may lead to the development of wholesome and valuable extra-curricular activities.

The camera-minded student of today may find an open door to employment in the future in this field. If he does not, he will have acquired a hobby which he may pursue and enjoy throughout his entire life.

—H—

SHOW REACTION TIME

A program centered around the demonstration of an individual's reaction time relative to safe driving was recently held at the college elementary school under the direction of H. T. Cluxton's eighth grade class. By means of statistics, it was brought out that drinking of alcoholic liquors slowed down the reaction, thereby making accidents more likely to occur.

—H—

Nina Claire Kelly, a former Humboldt student, is now working at Woolworth's in Eureka.

—H—

Eleanor Shaw visited relatives in Ferndale over the weekend.

Pedrotti Engaged To San Jose Girl

The engagement of Ray Pedrotti and Miss Eine Berry, a member of the Eureka High School faculty, was announced Sunday evening when the young people and the choir of the Presbyterian Church met at Miss Berry's apartment on K street after the evening service. The guests learned of the engagement when they drew hearts bearing the names of the engaged couple from a large wooden bowl filled with Valentine candies.

The bride-elect is from San Jose where she graduated from the San Jose State College. She taught for a year in Yreka before coming to Eureka last year to accept a position as a commercial teacher in the high school.

Ray Pedrotti graduated from Humboldt State College in June 1939 with honors, receiving an A. B. degree in Social Science. While in school he participated in many school activities. During his junior year he was business manager of the Sempervirens and in his senior year he was editor. He was president of Chi Sigma Epsilon. Pedrotti was yell leader for the college in his freshman and sophomore years, and in his junior and senior years he assisted the yell leader. He was in the college play, "The Taming of the Shrew" and belonged to the A Cappella Choir and the college band. Pedrotti was vice-president of the College Y, and he was a member of the club. He is now employed in the County Welfare Department.

Hart Discusses Track Program

Because of the fact that Humboldt State is so far from other colleges, and because it does not have sufficient funds nor enough athletes to support both track and basketball, it is difficult to say whether the school will enter into intercollegiate baseball competition this year according to Coach Herbert Hart. However, a suitable program has been worked out for the coming season by coaches Hart and Griffith.

Humboldt will have a track program consisting of two intercollegiate meets, and will work out an intramural baseball program. If there is enough interest and material in baseball, it may be possible to finance, in some way, two or three intercollegiate games at the close of the season.

If such a program turns out to be a success, there is a possibility that Humboldt may support both of these sports next year, it is said.

ASSIGNMENTS MADE FOR STUDENT TEACHERS

Tentative assignments of student teachers for the first half of the spring semester have been completed. Student teachers for this semester include for the kindergarten, Marjorie Cropley; first grade, morning; Harold Jenkins, afternoon—Jeanette Christiansen; second grade, morning—Betty McWhorter, afternoon—Christine Jacobsen; third grade, morning—Ted Graves and Don Pozzo, afternoon—Jayn Harville; fourth grade, morning—Stanley Colwell, afternoon—Helen Friedenbach.

Teachers in the upper division are fifth grade, morning—Doris Goff, afternoon—Barbara Crnich; sixth grade, morning—Kenneth Samuelson, afternoon—Myrtle Boehne; seventh grade, morning—Nick Barbieri, afternoon—Harold Langdon; and eighth grade, morning—John McGrath, afternoon—Fred Jackson.

Irma Hugnin was reported ill over the week-end from an attack of influenza.

Ski Hut Now Has Doors and Windows

Several members of the Humboldt College Ski Club worked on the ski hut over the weekend. They laid over half the flooring on the lower story and finished putting on the siding except for a small area near the peak on one end. The scaffolding is down, and all the windows and the front door are in.

Saturday Dr. William Lanphere, Robert Frakes, Jack Lawler, Robert Madsen, Jack Lennox, Emory Sitts, Glenn Arkelett, Wilson Meyers, and Frank Heuschkel Jr. worked on the hut. Emory, Glenn, Wilson, and Frank stayed all night Saturday night at the hut. Sunday, Dr. Lanphere, Mrs. Lanphere, Robert Madsen, Darrel Wing, Robert Bryan, James and John Cady, Ted Speier, and Jack Lennox joined the four who had stayed all night and they finished the work on the hut. John Cady, Wilson Meyers, and Frank Heuschkel Jr. are not members of the College Ski Club.

COUNTIES PRESENT

Over one-third of the California Counties are now being represented at Humboldt State College by students according to the college files. Humboldt County is the natural leader while Los Angeles and Mendocino County each have six students attending Humboldt State College. Other counties and the number of students attending college to date are Del Norte 5, San Francisco 5, Alameda 4, Siskiyou 4, Santa Barbara 3, Contra Costa 3, San Mateo 3, San Bernardino 2, Sonoma 1, Trinity 1, San Diego 1, Shasta 1, Sutter 1, Riverside 1, Solano 1 and Sacramento County 1.

Patricia McMillan, a former Humboldt student, enrolled in the school of nursing at St. Mary's Hospital in San Francisco on February 1.

Frances Larson visited her sister in San Francisco last weekend.

Basketball Squad Returns From Trip

Humboldt's basketball representatives, composed of Coach Harry Griffith and eight players, will arrive home today after a tour of southern Oregon. The squad left last Friday for Ashland, Oregon, where they played the Southern Oregon Normal team on the nights of the second and third. Humboldt won the opening contest by the close score of 50-49. Lee and Longholm starred with 12 points each. The next night they lost by a 48-44 score.

The squad continued north Sunday for Monmouth, Oregon, where they played the Oregon College of Education on Monday and Tuesday nights of this week.

Coach Griffith took along the following players: Ayala, Longholm, Lee, Wilson, Belcher, Howatt, Bishop and Savage.

Training School Receives Equipment

At the present time the college elementary school's home economic department is being equipped. Equipment received for the sewing and cooking rooms includes eight Wedgewood gas stoves, four units of cooking tables which will accommodate sixteen people, a General Electric refrigerator, six electric Singer sewing machines, a cook's table, and much small equipment.

This department will serve both the elementary school and the college classes in home economics.

Additional equipment received at the training school includes furnishings for the nurse's office, teachers' and pupils' rest rooms. Among these are couches, tables, chairs, floor lamps, and other necessary pieces.

SLUMBER PARTY HELD

Mary Eads had a slumber party and pot luck dinner the Friday night of finals at her home in Eureka. Those attending the party were Mary Borneman, Susan Wilson, Beryl McCann, Beverly Bullock, Marianne Lambert, Faye McCord and the hostess Mary Eads.

Coach Hart Issues Track Equipment

Coach Herbert Hart of Humboldt State has already issued equipment for the coming track season, and, weather permitting, the track candidates will get an early start this season. Two meets have been scheduled for sometime in April. These meets will be with Southern Oregon Normal here, and California Aggies at Davis.

Coach Hart has issued equipment to the following men: Dashes: Mahan, Trione, R. Davis, Waters, Matteoli, and Chiodo. Middle distance: Edsall, Hibler, R. Davis, L. Walton, H. Walton, Rousseau, Monroe, Montgomery, Eskelson, DuMond, Duff, Pinney, and Frakes. High Jump: Flink, Thornton, Givins, Simpson, DuMond, and Olson. Pole vault: Speier, and Longholm. Broad jump: Mahan, and Trione. Shot put: Thornton, and Barbieri. Discus: Thornton, Barbieri, and Givins. Javelin: Thornton, Flink and Thorn.

Student At San Jose

Don Pedrazzini, former Humboldt State student, is now enrolled as a junior at San Jose State College. He is majoring in the field of aeronautics which he intends to enter via the army air corps.

Birds To Be Sent For Propagation

Humboldt State men who participate in the care of the game birds to be sent to Humboldt State by the Fish and game Commission for propagation will be receiving a real education. These boys will have first hand knowledge on how to raise and care for game birds as well as first hand knowledge on modern principles of conservation and wild life. Care of the birds will offer a vocational outlet for some boys who will eventually take up fish and game work as life work.

The site tentatively selected for the erection of the brooder pens which will be financed either by the State Game Commission or the local Fish and Game Club is just east of the new fish hatchery. Present plans are to install fifty brooders at this time with the possibility that the number be increased to one hundred later. The first consignments will consist of quail and pheasants.

Since the advance of civilization makes it difficult for some of the game birds to maintain their natural habits and the nesting habits of some of the wild birds are seriously interfered with, the State Fish and Game Commission, with their various game bird farms, are providing some of the incubation and brooding conditions which these game birds formerly provided for themselves.

The birds will be cared for here under the supervision of the science department until such time as they are ready for liberation in various sections of the county.

Filing System Being Arranged

A systematic filing system of zinc halftone newspaper cuts is now being arranged by Graduate Manager Bob Madsen of Humboldt State College. The system being arranged is similar to that used by modern newspapers.

According to Graduate Manager Madsen all the cuts and mats owned by the college will be filed in large envelopes which are numbered and then placed in a file box. Index cards are being compiled and every person having had a halftone will be listed. Citing for example the index card for Nick Barbieri lists his home as Sacramento, California. "Varsity football line and backfield 1937, 1938, 1939; Varsity track (weights-hurdles) Baseball; Active in dramatics; Jr. Varsity football co-coach for the first JV football team; Student Body President 1938-39; File No. 1 pose picture; football group picture of '39 coaching staff, Hart, Griffith, Farber, Barbieri."

Madsen stated for example that by looking in file No. 1 you would find a cut of Nick Barbieri in a football coaching staff group and also another cut of Barbieri in every day clothes.

Up to the present time there has been no systematic check or control of cuts and as the missing cuts are found they will be placed on file where they can be secured on a moment's notice. The annual cuts are also being filed but in accordance with the yearbook. The reason for this, Madsen stated, is that the annual cuts can not be used by all newspapers. To date over fifty cuts have been filed besides the 1939 annual cuts.

WILLIAMSON SPEAKS

Ellis Williamson, Humboldt State student from Eureka, was one of the guest youth speakers to talk on, "How to Keep United States Out of War" at the Arcata Methodist Church Sunday evening.

Williamson is a member of the freshman class and is taking a pre-legal course at Humboldt State.

ROTARY SPEAKER

Dr. Raymond Fisher of the history department recently spoke at an inter-city meeting of the Rotary clubs. The meeting was held at Garberville. Dr. Fisher's topic was "Conflict of Three Empires."

Flying Head Here On Inspection Tour

Grove Webster, Chief of the Private Flying Development Division of the Civil Aeronautics authority was at Humboldt State last Friday on an inspection tour of the college flying school. He seemed well-pleased and gave President Arthur S. Gist some hope of future developments.

Webster hopes to have the government help Humboldt in securing equipment such as airplane motors for the ground courses. Furthermore, he hopes to have the number of students to be trained to be increased next year. He also hopes to have an advanced course offered for those securing their private pilot's license. This advanced course would lead to a commercial pilot's licence.

First Story Walls

Continued from page One
various levels where concrete is being poured. At these levels the concrete is discharged from the skip into concrete buggies which convey it to various parts of the building. After concrete has been poured it has to be kept moist for ten days. Three-fourths inches of finished cement topping similar to the slab forming the entrance to the college will then be placed on the rough concrete floor slabs. Most of the floors will be covered with three-sixteenths inch linoleum.

The new dorm is to consist of two dormitory wings, one for women and one for men, with the commons in between. There will be accommodations for from seventy-five to eighty students.

All rooms will open off the corridors. Eleven feet by sixteen is to be the average size of the forty-one bedrooms. The rooms will have steam heating and direct lighting. There are to be two or three base plugs for student lamps, floor lamps, etc. besides the overhead lighting. Each room is to have a built-in dresser and two clothes closets.

Each wing will have a laundry room, and there will be a bathroom on each floor of each wing. Of interest to the boys should be the pantry which opens off of the girls' living room. It is to be equipped with sink, electric hot

Boomerang Fad Hits Humboldt

"Rumor has it that 'Humboldt is going native.' The rumor started after an observer had been watching several students throwing boomerangs. Now, a boomerang is any missile which when hurled will return to or near the place from which it was thrown.

"Pop" Jenkins became interested in the art after being informed that the boomerang performs accurately and consistently only when thrown as to curve from right to left. He is trying to perfect a method of throwing one from left to right.

Boomerang throwing is an individual rather than a group activity. What's more, there is not only one type of boomerang but several and each with its variations. Chief among them are the curved or Australian type which is heavy and dangerous, the Cross-stick boomerang which is the pinnacle of perfection, the Boomabird which is the most picturesque, the Tumblestick, an intriguing yet simple model; and the Pin-wheel boomerang, the most perfect of the cross-stick type.

The ancient Egyptians are said to have used the boomerang as a missile. The natives of South India have also used a weapon made of ivory and steel which is similar to the boomerang. Other users were the Hopi Indians of Arizona, but the greatest developers of the art are the Bushmen of Australia.

Boomerang making is essentially jackknife whittling. Ideal woods used are basswood, tulip, and white pine.

plate, and other essentials.

All of the exits from the second floor are to be trough fireproof stairways at the end of the halls. These stairways will take the place of exterior fire escapes.

A.W.S. Invited To Attend Parley

The Associated Women Students of Humboldt State College have been invited to send representatives to the annual Alta and Central California A.W.S. Conference which is to be held at Modesto Junior College this year on March 29 and 30.

It is hoped that more delegates will be able to go this year if transportation can be arranged and the financial condition of the organization warrants it.

Humboldt first took advantage of the invitation last year when Bessie Boehne and Rosie Ivanich acted as representatives at the conference which was held in Fresno.

Delegates will be elected at a meeting of the A. W. S. which is to be held in March.

ENROLLMENT SHOWS UNUSUAL INCREASE

An unusual increase in enrollment has been felt at Humboldt this spring. When the registration is complete, the total number of students will probably be equal to that of the fall semester.

Among those who transferred to Humboldt from other colleges are Vernon Smith, San Francisco State; Rowena Ammer, San Francisco State; Jack Schott, Compton Junior College; Lois Henderson, University of California; La Verne Gustafson, Pasadena Junior College; and Arabela Carpenter, Chico State.

TALK BY TOLLE

Dr. Vernon O. Tolle, superintendent of the College Elementary Training School, spoke at the Jane's Creek P. T. A. last Friday. His subject was educational.

Healthful, Slenderizing, Recreation. Every night from 7 to 10:30. Matinee Sat. and Sun. 2-5 p. m.

Boney Structure Determines Weight

The width, weight method of determining a person's correct weight is the method used in Humboldt's health office. Under the old method the weight of person was determined by a scale using age and height. By this method a person was supposed to weigh so much regardless of the size of his bones. This method was not very successful, because some people have large bones and others have small ones.

Dr. Prior worked on the width weight table over a period of several years. She observed children while they grew from pre-kindergarten to college age. From the results of her observations she compiled a width-weight table.

In this table the width of the hip bones and the shoulders are used as an index of the type of bony structure an individual has. Then the height, age, and measurement of the hips or shoulders or both are used to determine the ideal weight of a person instead of just the height and age. This new method is proving quite popular as it can be used over the clothing.

BALABANIS SPEAKING

Dr. Homer Balabanis is speaking this noon-time at the Cruise Club meeting being held at Hunter's. His topic is "Future Peace or War in Southeastern Asia?"
